

O Man's dominance continues but out-cross interest is 'bubbling' through

Searching for new blood

Devon-based dairy producer and renown cattle breeder – and three-times NMR/RABDF Gold Cup finalist – Willy Ley discusses the latest sire rankings with CowManagement.

text Rachael Porter

Many producers have been scrutinising the April bull proof figures even more closely than usual in search of a bull that is not related to O Man (O-Bee Manfred Justice). One such producer is Willy Ley. And his first reaction is one of surprise about fourth-place bull Braedale Goldwyn. Goldwyn has further improved his PLI and earned the title of 'tremendous long-term all-rounder' from some breeders. "But I'm milking some Goldwyn daughters and I have to say that I don't think they're that good. They're not bad, but I've milked better," says Willy. That said, consensus is that this bull's early sons will generate great interest. The highest ranking at the moment is Ladys-Manor Aurora, with a PLI of £136.

No surprise

Still at the top of the list, which is of no surprise to Willy or any other breeder for that matter – is O Man himself. He's dominated the Holstein Profitable Lifetime Index (€PLI) list since 2003 and leaves a trail of his sons in his wake. And this means that those who have either used these bloodlines heavily already or would prefer to find an alternative will have to 'dig deep'. High ranking non-O Man bulls are Goolstar Diamond (by Jocko) at PLI £161, and three bulls level-pegging at £156 PLI

Willy Ley

– Gibor (by Gibon), D Teis (by Titanic) and Kings-Ransom Dover (by Laudan). DairyCo's head of genetics Marco Winters says that every producer should have a place for O Man bloodlines in their herd. "These bloodlines provide a means by which to improve the health, welfare and fitness of the UK cow population and to positively impact on herd profitability into the bargain," he says.

Genetic variation

"Producers who have already heavily invested in these bloodlines will need to look elsewhere, but already there are sons of bulls such as Shottle, Goldwyn, Ramos and Laudan coming on stream, and these will help maintain genetic

variation and meet a whole range of breeding objectives for a lot breeders." New interest from the UK comes in the form of the highest ranked new UK progeny tested bull, Cogent Elvina. With a PLI of £158 and a PTA that is strong on milk solids and good for daughter fertility, this bull provides some relief from the O Man dominance. The January proof run's highest new UK proven bull, the Talent son Woodmarsh Talisman, has improved on his already strong fitness transmitting abilities and, with a PLI of £153, he now comes into the top 40. Willy has his eye on him, with a view to putting a few straws in his AI flask. "He's a good bull and he's getting better – he is definitely one to watch."

Climbing again

Mascol is climbing again too. He's now 43rd and he's another sire to monitor closely. "And I'm also interested in McCormick and Manifold – they're in 15th and 11th place respectively. "They're making their way up the rankings as more daughters are added to their proofs and I shall have some of my own on the ground shortly as I've used both sires on my herd. "As their figures increase, I'm more and more eager to see what those daughters are like and how they're going to perform." Taking a step back, Willy is still amazed to see the return of such dominance by US bulls. "For several years US bulls at the top of the rankings have been few and far between, after considerable dominance just a decade ago. "But now things are back to how they were in the early 1990s – US bulls are top of the pack." |

Braedale Goldwyn

Gran-J Oman McCormick
