

Health and fitness feature in new wave of sires

Goldwyn and Shottle sons start their ascent

Devon-based Willy Ley owns the renowned Thuborough herd – three times finalist in the NMR/RABDF Gold Cup. He talks to CowManagement about the August Holstein sire rankings.

text Ann Hardy

The theme may be more of the same in the August proof run – with almost complete domination by Oman and his sons – although a handful of Goldwyn and Shottle-sired newcomers bring something new for those who are seeking a different direction.

But the performance of Oman cannot pass without comment, for this remarkable bull – who is responsible for all but two of the top 20 sires ranked on PLI (Profitable Lifetime Index) – has managed to improve on his already unprecedented performance.

The need to dig deep for something new is no surprise, and it is in 26th position that we find the first of the newcomers, Glenn-Ann Palermo. The highest ranking of the Goldwyn sons improves on fat and protein percentages and has superb indexes for SCC, Lifespan and daughter fertility, with a Fertility Index of +6.2. Type Merit is 2.3.

“He is definitely one to look at,” says Willy. “We never got on particularly well with Goldwyn himself in our herd, but I would look at any bull in his own right. “I’m particularly interested in bulls with good Lifespan proofs, as my experience is that this figure in particular rings true. If

Willy Ley

we look at ‘the bulls we love to hate’ in our herd, we often find they have a poor score for Lifespan.”

Jordan used as young sire

Palermo shares his position with Laudan son, Kings-Ransom Dover, who had an early proof in April but has been officially launched this proof run. He transmits a similar ‘no-holes’ breeding pattern, and with +2.1 for direct Calving Ease, is suitable for use on heifers.

Another of interest is the second Goldwyn son, Gillette Jordan – newly proven in August although already used in the UK as a young sire. Jordan ranks immediately beneath Palermo and Dover, offering the highest type of the three (TM +2.9).

Immediately behind is the highest ranking UK-bred and proven bull – Cogent Elvina. With a PLI of £167, Elvina is sired by the Lukas son Maestro, and improves on his first proof in April.

First Shottle sons

The first Shottle son to earn himself a top 50 proof, is another UK progeny tested bull – Cogent Twist.

“He’s got 491kg milk which is good for a Shottle son, and it’s particularly interesting that he combines this with positive components,” says Willy. “But more important is that his mother is still milking, so he’s definitely one I’d consider, although I’ll be limited on how I can use him as we’ve used more Shottle in our herd than almost any other bull.”

“I notice Bidlea Padbury has moved up a lot since the last proof run,” continues Willy.

“It’s a move in the right direction and reflects well on the British progeny testing system which is always encouraging to see.”

But the industry is lacking important new information, according to Willy, who believes breeders should have access to a ranking of sires with a genomic proof on a UK scale.

“We need to see what new blood is available and see where it sits in the PLI ranking,” he says. “I would not jump in and use everything based on genomics at this point, but I’d like to use more and it would definitely widen our choice of bloodlines and potentially increase the genetic progress we could make.”
