The publisher regrets that in the above article, the formula for “the weighted difference vegetation index” on page 159 was incorrectly printed. It is now reproduced correctly, below.

The weighted difference vegetation index

$$\left(\text{reflectance}_{\text{crop, near infrared}} - \left(\frac{\text{reflectance}_{\text{soil, near infrared}}}{\text{reflectance}_{\text{soil, red}}} \right) \text{reflectance}_{\text{crop, red}} \right)$$
