

Gateway2Food: connecting people

Mariëlle Timmer, Jeen Broekstra, Jan Top, Don Willems

Find expertise and people

- Food & Nutrition Delta (FND) wants to connect the demand and supply side of food expertise to stimulate innovation
- FND asked Food & Biobased Research and Schuttelaar & Partners to develop a web application to find expertise, knowledge, know how and people in the food sector:
www.gateway2food.nl

Help to define questions

- The user is supported by a knowledge model to help to define the question or the expertise
- For instance, with the term *food*, the application suggests *functional foods*, *food research*, *health* and *overweight* to detail the problem or expertise
