Fleet brewing may be future of beermaking

DOMINIC WALSH The Times October 11, 2010 11:45AM

SABMiller, which owns such brands as Pilsner Urquell, may produce its beers offshore on a floating brewery in the future. Source: The Australian

ONE of the world's biggest brewers may build large floating breweries to respond to the industry's future water and energy needs.

There are oil platforms, factory ships and cruise ships so large they are more like floating towns - and now SABMiller is looking into the concept of ship-borne breweries amid predictions that water and energy, both key to beer production, will become increasingly scarce commodities over the next 20 years.

SAB Miller, which owns such brands as Pilsner Urquell, Grolsch and Peroni Nastro Azzurro, has invested heavily in making its breweries more efficient due to the size and scale of its existing
