Extreme North Sea storm surges and the changing climate: An ensemble study

Andreas Sterl, Henk van den Brink,
 Hans de Vries, Rein Haarsma, Erik
 van Meijgaard

How will climate change affect the 1-in-10,000 years storm surge along the Dutch coast?

- 17 member ensemble
- climate model + surge model
- 150 years (1950-2100) under SRES A1b forcing
- => long time series
- => statistically highly significant
