

Flood policy: resilience *and* control?

R.M.Bredenhoff-Bijlsma, M.S.Krol, A.Y.Hoekstra

- We compare a resilience and control rationale for flood policy
 - Advantages/ disadvantages
 - System attributes
 - Examples of either rationale in Dutch flood policy

- We show clearly that high control precludes resilience
 - the system attributes for the two rationales are antagonistic

The list of system attributes we developed allows more explicit assessment of policy
