Heusinkveld et al. (2011)

### Out of their comfort zone...

Rathenau Instituut

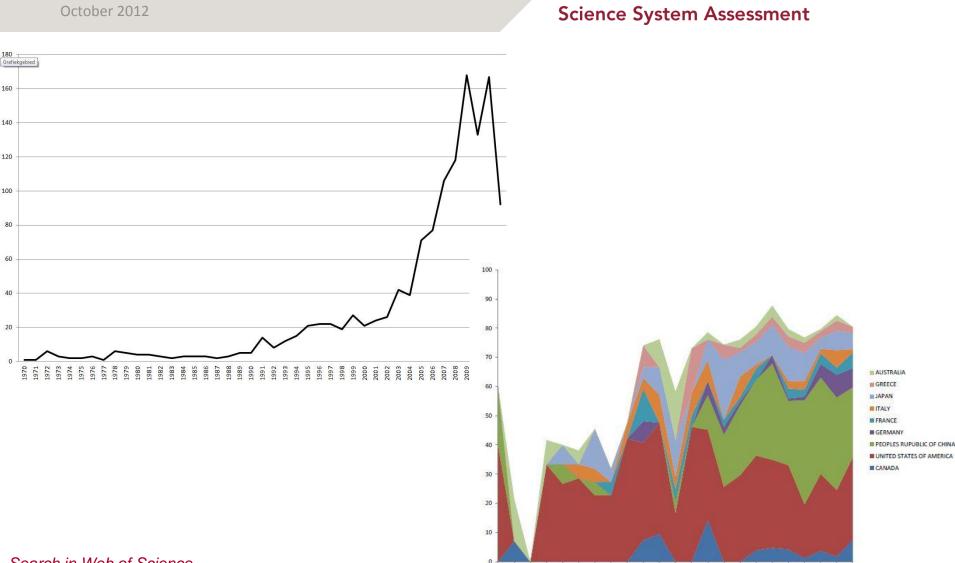

October 2012

- Scientific knowledge production with strong societal interest, contextualised local knowledge base
- Team of (knowledge) producers and users
  - 3 university groups, 3 research institutes, 2 consultancy companies, 2 municipalities, 2 other govern. organizations
- 'Home organizations' of team members value knowledge products differently

### ... with something to win...

Rathenau Instituut

Rathenau Instituut

October 2012

- Important but vulnerable: protection needed
- Large-scale research programme creates safe haven
- Contributions:
  - Protection has been perceived as a given fact and underconceptualized (Smith and Raven, 2012)
  - Extend niche concept from technological development to knowledge production

### **Research questions**

Rathenau Instituut

October 2012

- Questions:
  - 1. Protection: what is the role of users in creating and maintaining niche boundaries?
  - 2. Aggregation: how do niche products relate to other user locales, practices and situations?

### Methodology

Rathenau Instituut

October 2012

- Operationalization of (sub)concepts
- 17 projects
- In-depth interviews
- Document analysis
- Analysis in progress: in-depth results of 1 case presented here

### 1. Set-up of niche boundaries?

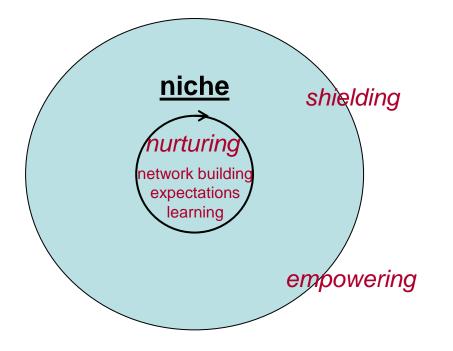

**Rathenau Instituut** 

October 2012

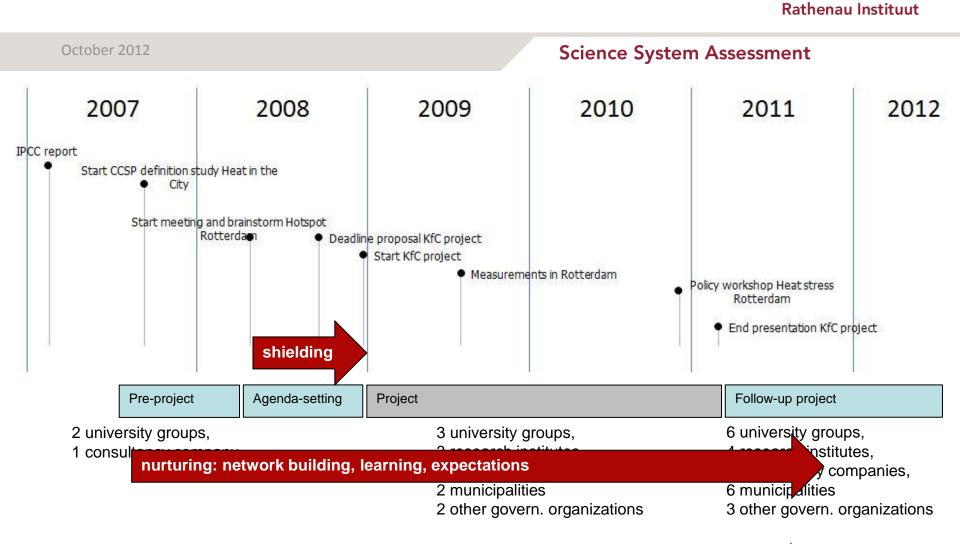

**Science System Assessment** 

• Key processes in niche protection (Smith & Raven, 2012)

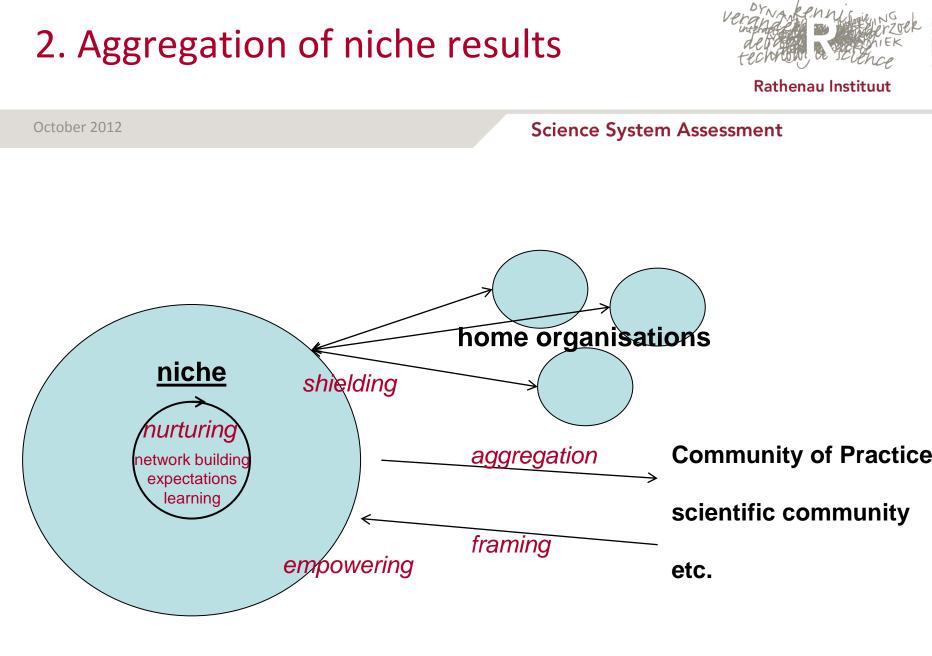

### 1. Set-up of niche boundaries?

empowerment

'Local level'

'Global level'

## 2. Aggregation of niche results

Rathenau Instituut

October 2012

- Struggle to align with rules of 'home organizations'; representation
- Link to 'global' community but leave room for local interpretations as articulated by users
- Geographical dispersion: choice for skills; knowledge is tacit and 'unsticky'

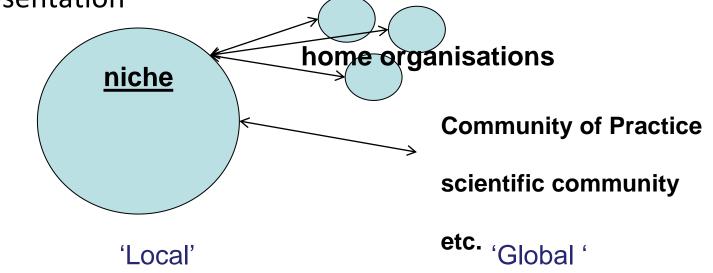

Rathenau Instituut

October 2012

- Users co-produce niche boundaries through shielding, nurturing and empowering
- Empowerment: users co-produce narrative (vis-à-vis antinarratives)
- Protection and aggregation: incentives; transfer; representation

Rathenau Instituut

October 2012

- Currently, 15 projects studied in Knowledge for Climate
- Further research: comparison to other projects in which protection is differently organized:
  - other programmes?
  - monodisciplinary projects?
  - other sectors?
  - other kinds of users?

October 2012
