

## Climate effect atlas

Hot spot  
Zuidplaspolder

Adaptation in dry  
rural areas

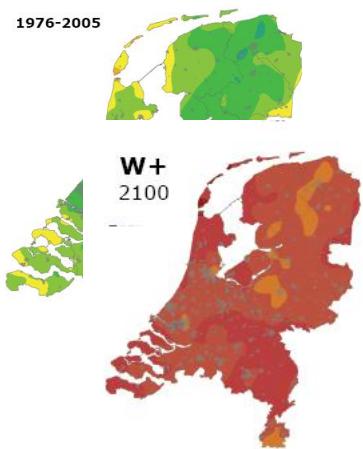

The Climate  
Effect Atlas: a tool  
for policymakers

*From idea to  
realisation*

Erik de Haan  
Hasse Goosen

# Contents of this presentation

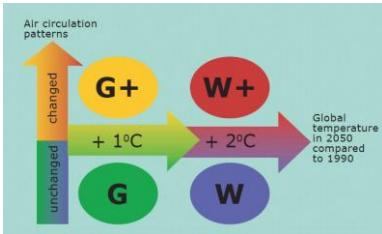

- A plan
- It's the Weather, stupid!
- From figures to maps and back to policy
- The Atlas in detail
- The digital age

## Environmental policy plan 2006-2010 (Spring 2006)

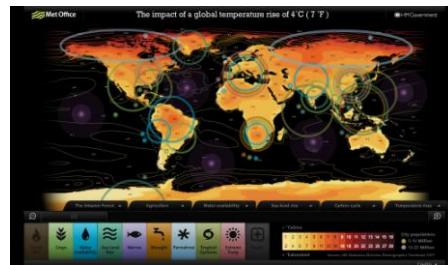

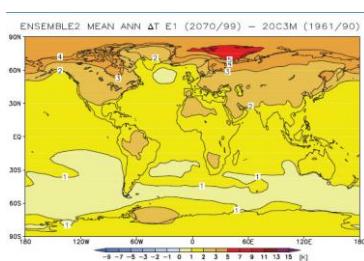

- Water policy:
  - River and local flooding
  - Coastal improvement (safety and quality)
  - Drought
- And one strategic adaptation action:
  - '*We start actions now to climate proof Zuid-Holland (with an emphasis on spatial planning)*'
- But: no money

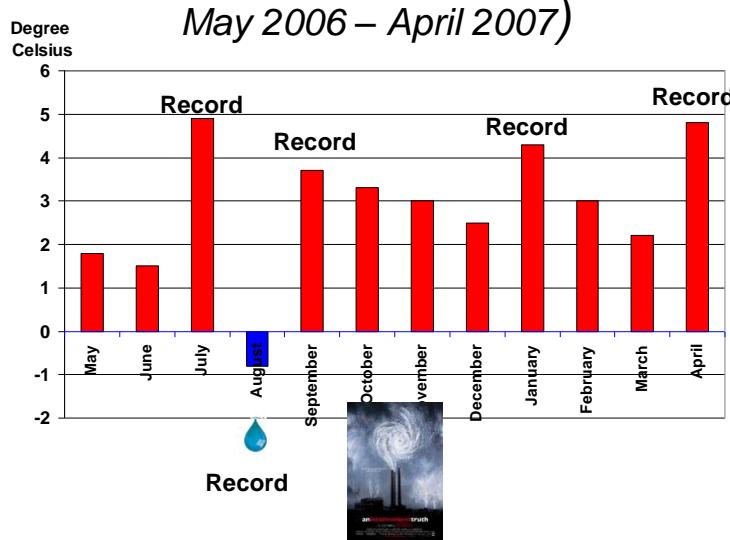

# New KNMI climate scenarios (30 May 2006)

- Higher expected temperature rise
- Higher risk for drought

The weather puts climate on the agenda  
(*Monthly temperature anomalies De Bilt*  
May 2006 – April 2007)

## Spring 2007:

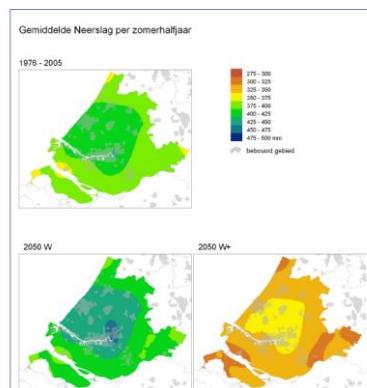

### New Coalition agreement:

- ❖ The province will develop a new spatial strategy
- ❖ Action programme Climate and Space
- ❖ Climate proof development Zuidplaspolder
- ❖ And: money!!!

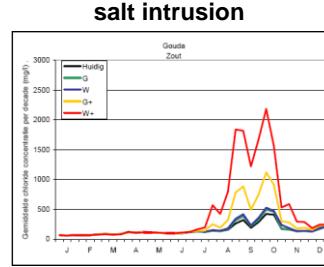

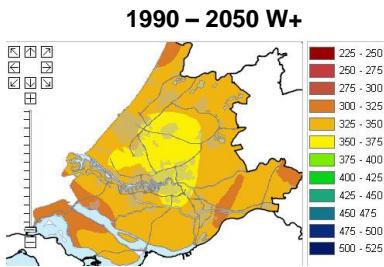

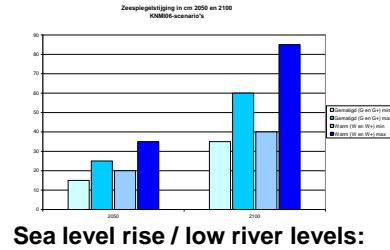

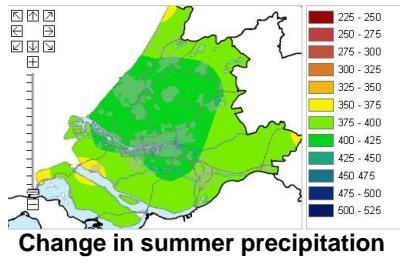

## 2007 – 2008: From figures to maps

- Co-development: science institutes – provinces
- Zuid-Holland pilot province (first atlas early 2008).

	G	G+	W	W+
Global temperature rise	+0.9°C	+1.0°C	+2°C	+3.2°C
Change in air circulation patterns	no	yes	no	yes
Winter				
average temperature	+0.9°C	+1.1°C	+1.8%	+2.3%
coldest winter day per year	+1.0%	+1.5%	+2.1%	+2.9%
average precipitation amount	-6%	+7%	+7%	+14%
number of wet days (>0.1 mm)	0%	+1%	0%	+2%
10-day precipitation sum exceeded once in 10 years	-4%	+6%	+8%	+12%
maximum average daily wind speed per year	0%	+2%	-1%	+4%
Summer				
average temperature	+0.9°C	+1.4°C	+1.7°C	+2.8°C
warmest summer day per year	+1.0%	+1.9%	+2.1%	+3.8%
average precipitation amount	-3%	-10%	+6%	-3.9%
number of wet days (>0.1 mm)	-2%	-10%	-3%	-3.9%
daily precipitation sum exceeded once in 10 years	+1.3%	+5%	+27%	+10%
Sea level				
potential evaporation	-2%	+8%	+7%	+15%
absolute increase	15-25 cm	15-25 cm	20-35 cm	20-35 cm

# Primary and secondary climate effects

## Combination of climate effects and functions: vulnerability mapping

Adaptation priorities 2050:

- The Delta
- The Green Heart
- Lower Rhine river

# Draft spatial vision 2020 – 2040

(December 2009)

## Central ambitions:

- ❖ Attractive and competitive
- ❖ Sustainable and climate proof

**BARACK OBAMA 2020**

**I'M SORRY.**  
WE COULD HAVE STOPPED  
CATASTROPHIC CLIMATE  
CHANGE... WE DIDN'T.

**COPENHAGEN 2009**  
**ACT NOW - CHANGE THE FUTURE**

**NICOLAS SARKOZY 2020**

**I'M SORRY.**  
WE COULD HAVE STOPPED  
CATASTROPHIC CLIMATE  
CHANGE... WE DIDN'T.

**COPENHAGEN 2009**  
**ACT NOW - CHANGE THE FUTURE**

**ANGELA MERKEL 2020**

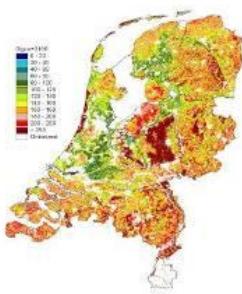

**I'M SORRY.**  
WE COULD HAVE STOPPED  
CATASTROPHIC CLIMATE  
CHANGE... WE DIDN'T.

**COPENHAGEN 2009**  
**ACT NOW - CHANGE THE FUTURE**

tck tck tck GREENPEACE

## Objectives

# Approach

WAGENINGEN UR  
For quality of life

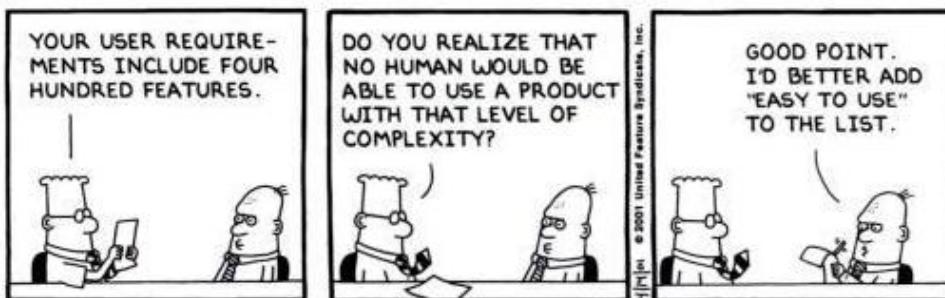

Royal Netherlands Meteorological Institute  
Ministry of Transport, Public Works  
and Water Management

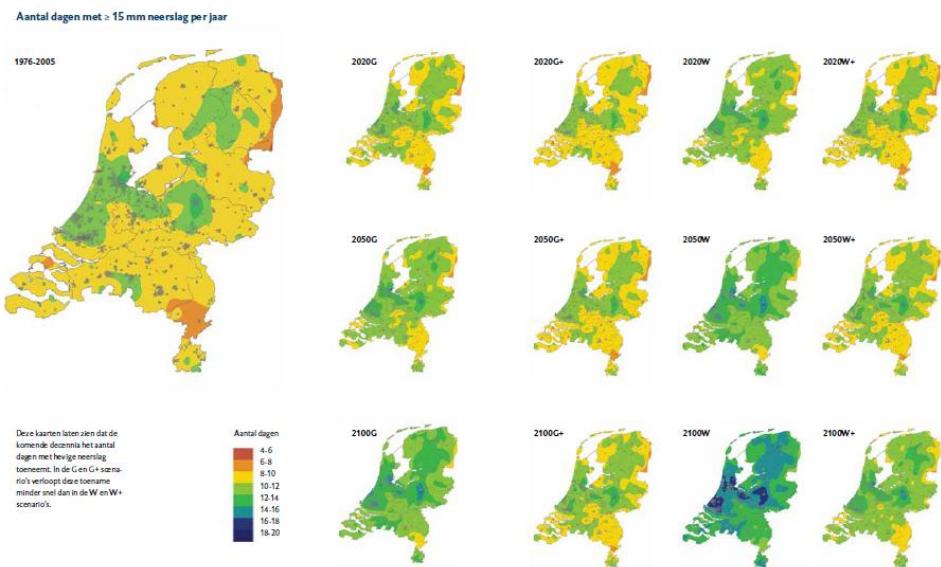

- Stakeholder analysis/policy needs
- Collaboration provinces, universities, KNMI, consultants
  - Expert Sessions
- Internet Geoportal

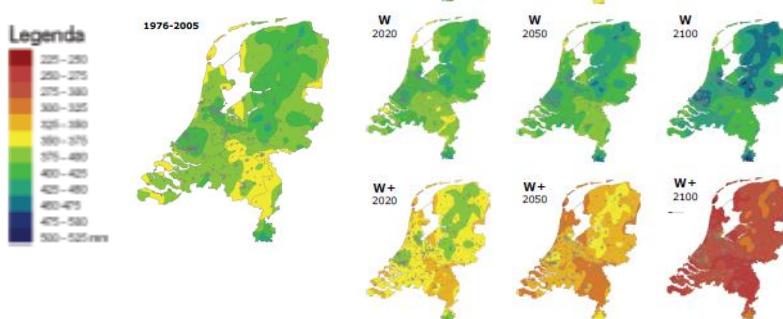

## Key challenge: complexity vs usability

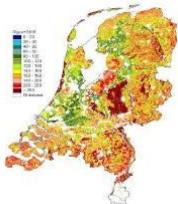

# Primairy impacts complete

# Dry summers

# Secundairy impacts

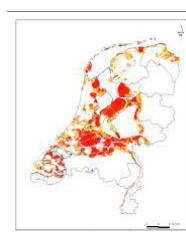

**Drought**  
(Alterra)

**Salinity**  
(TNO-  
Deltares)

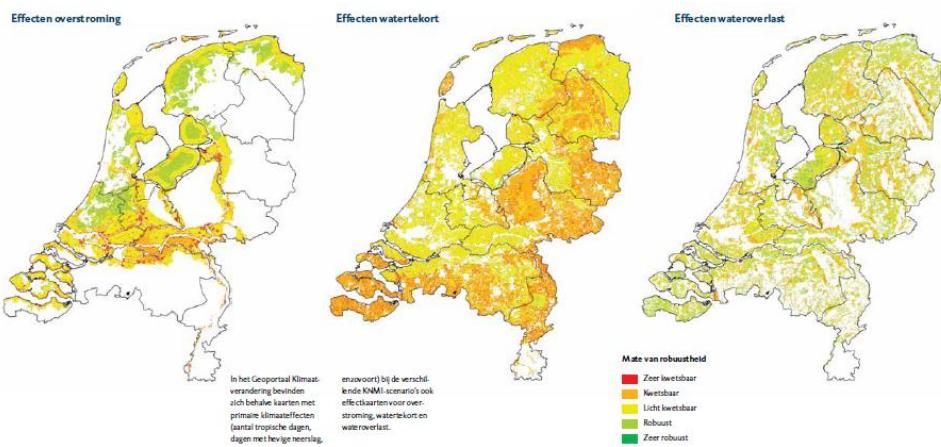

**Storm water**  
(Future Water)

**Floodrisks:**  
Waterdienst

# Landelijke robuustheidskaarten

# Demo Geoportal
