*RHDHV Room for the River /
Deltaprogramme projects*

ORAS HS Grote Rivieren, Nijmegen, 30 januari 2014

Room for the River

- RftR is a national flood protection program at more than 30 locations along the Rhine, IJssel, Waal, Lower Rhine and Lek we let water flow more freely.
- The goal: A safer river for four million Dutch people
- RHDHV is involved in the largest part of the program
- Involvement in studies, EIA, design and execution of works

Deltaprogramme

- The Deltaprogramme is a national programme. The Central Government, provinces and municipalities work together with input from social organizations and the business sector
- The goal is to protect the Netherlands against flooding and to ensure sufficient fresh water for future generations.
- RHDHV participates in 7 of the sub-programs
- Involvement in stakeholder management, EIA, studies, design and execution of works
