

Exploring Community Livelihood Adaptation for Model Based Adaptation Pathways in Bangladesh.

Umme Kulsum

PhD Fellow- Socioeconomic System Modeling, ADM Project,
TuDelft and IWFM BUET

- ❑ Bangladesh- a country of growing economy and long term sustainable delta development is the main focus
- ❑ Food security and pro-poor development is a key component and **livelihood adaptation** is necessary to ensure that.

Adaptation decisions are not only taken by
the Government

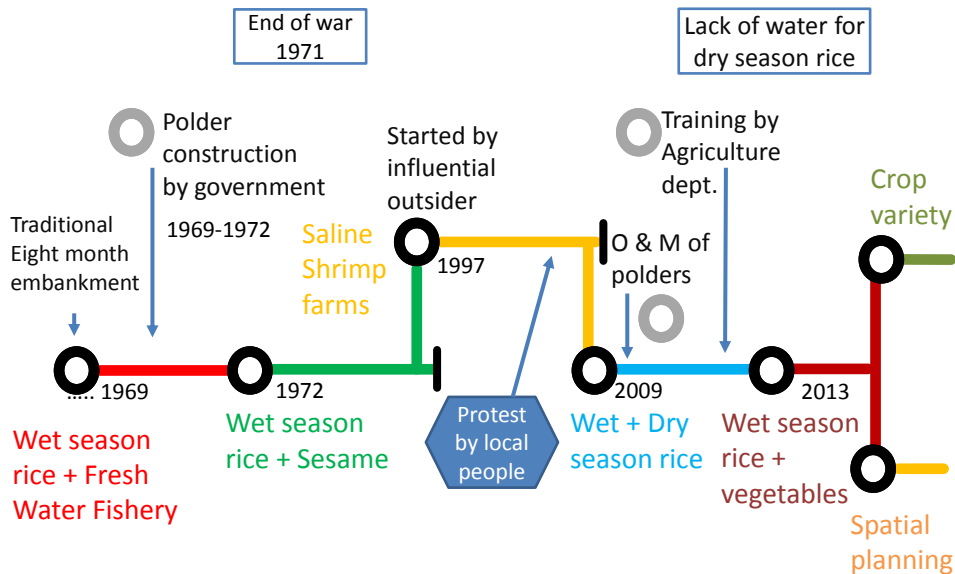

but also

people are adapting their livelihood over
time.

Government and People do interact with each other in taking decision

Influential Factors and interaction with government

livelihood adaptation pathway of farmers community in Polder 32 of Bangladesh

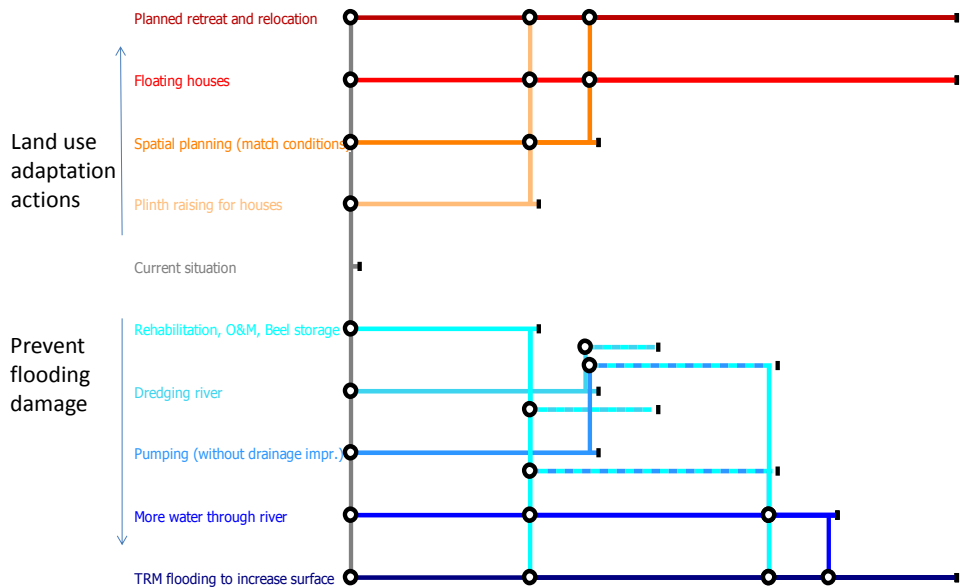

Challenges are-

- Future climate and socioeconomic development is uncertain
- Dynamic interaction of social system with environmental changes and government policy
- Lot more can arise.....

Thank you

Government adaptation pathways
