

Pathways to Resilience in Semi-arid Economies (PRISE)

A CARIAA Consortium
(Collaborative Adaptation Research
Initiative in Africa & Asia)

Research for climate-resilient futures

Our Vision

PRISE is a five-year, multi-country research project that generates new knowledge about how economic development in semi-arid regions can be made more equitable and resilient to climate change.

PRISE is a demand-led research programme responsive to the knowledge needs and priorities identified by policy clients and decision-makers.

We want to achieve a future where semi-arid lands are growing in a way that is inclusive, equitable and resilient to climate change.
