

Nematode taxonomy and systematics online - The Loof Literature Collection

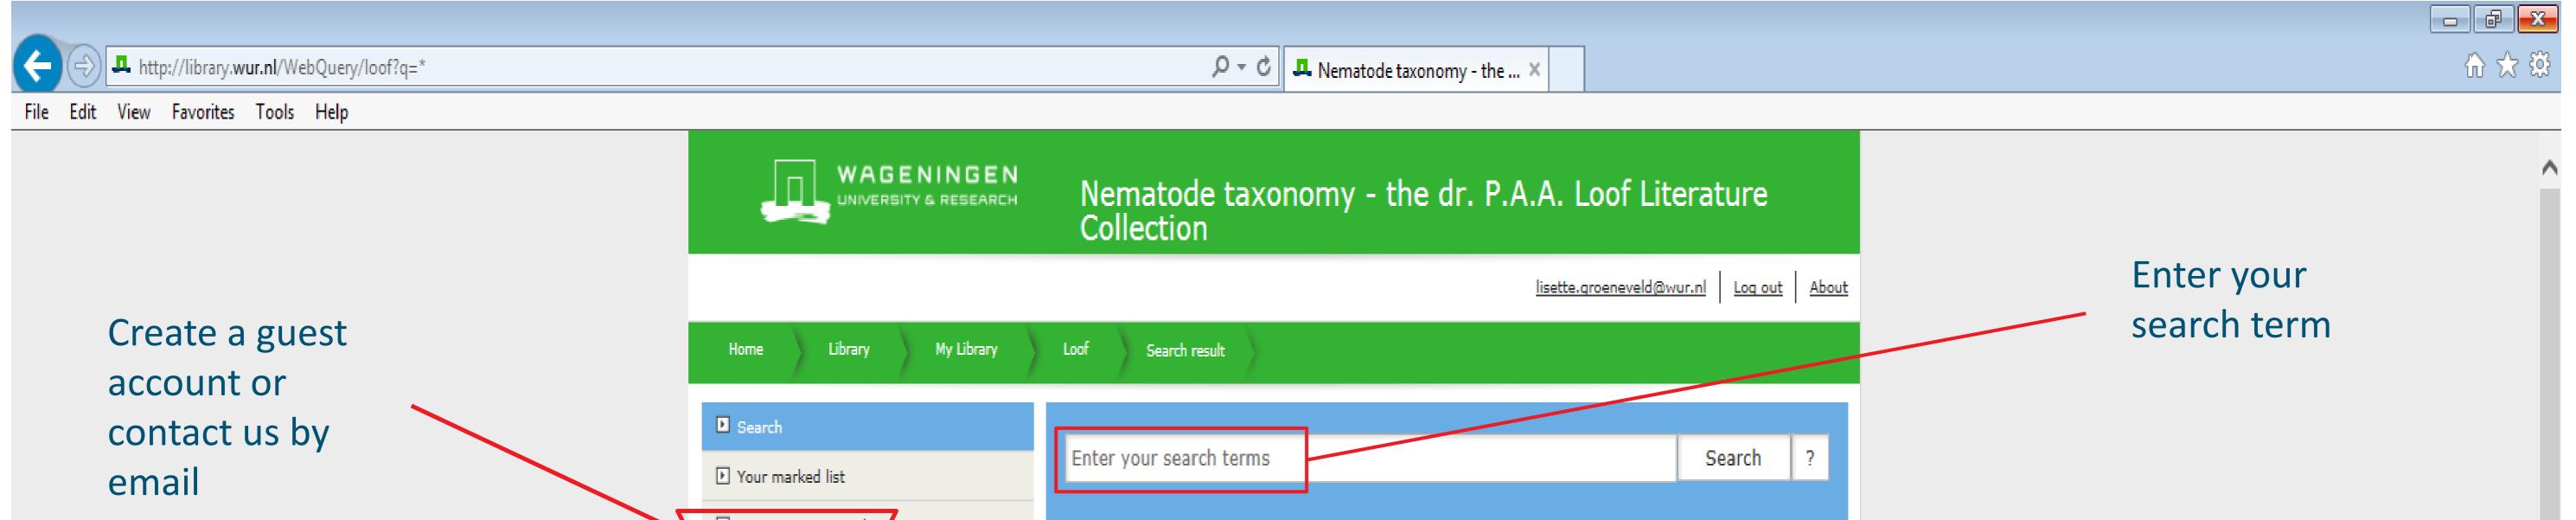

- Particularly for rare taxonomical articles -

Background

The Laboratory of Nematology and Wageningen UR Library are digitizing over 3,300 articles on nematode taxonomy and systematics (mostly from the pre-digital era). These papers were collected by Drs. Piet Loof, a nematode taxonomist at the Laboratory of Nematology of Wageningen University. Drs. Loof has been active as an eminent nematode taxonomist from 1955 till 2007. After his formal retirement in 1988, he continued working for more than two decades. As a part of his heritage, he left a literature collection on nematode taxonomy and systematics.

To make this literature collection accessible and searchable, the Laboratory of Nematology, in close cooperation with Wageningen UR Library, took the initiative to digitalize scientific literature from before 1996 (from that year onwards, most journals shifted towards on-line publishing).

All 3,300 articles are visible and searchable on-line; a wealth of information on nematode taxonomy and systematics from the years 1859 onwards. Currently (Summer 2018), over 2,000 articles have been digitized, and they can be consulted from behind your desk.

	How to get an article?	e.g. nematod* AND gagarin, globodera OR heterodera, "free living nematodes", nematod* NOT model*

The process of digitization is not yet finished but we felt this digitalization process was in a stage that it deserved to go life, and from now onwards it can be accessed via <u>http://library.wur.nl/WebQuery/loof?q=*</u> (see QR code on top)
