

O Man's dominance continues in latest bull proof run

Top-PLI sire retains remarkable position

Devon-based dairy producer and renown cattle breeder – and three-times NMR/RABDF Gold Cup finalist – Willy Ley discusses the latest sire rankings with CowManagement.

text **Rachael Porter**

O Man's unprecedented dominance continues with the latest bull proof run and at first glance things may look the same. But beneath the surface there are some new bulls quietly emerging and two brand new Calving Ease indexes adding important independent management information.

Willy Ley certainly viewed the latest figures with interest and still a degree of astonishment. "The fact that there are no real changes this time around comes as no surprise," he says.

"And there's no denying that O Man is an impressive bull with some impressive sons. Not even Blackstar, with his global success, managed to dominate the rankings like this. You have to be impressed."

He's been admiring their low somatic cell count scores: "All, with Gerard being the one exception, offer the genetic potential for good udder health. And Gerard makes up for it with his exceptional type merit score of 2.5."

O Man himself (O-Bee Manfred Justice) retains his remarkable stronghold on the number-one position when ranked on Profitable Lifetime Index (EPLI). O Man's new direct Calving Ease index (dCE%) further strengthens his status, which at

Willy Ley

+3.4 is one of the best in the top 10. "The new Calving Ease indexes are expressed as a 'percent easy calvings' on a scale of around -4 to +4 around a breed average of zero.

Positive figures indicate that calvings are predicted to be easier than average and negative figures predict more difficult calvings."

Fertility improvements

Alongside dCE% (predicting the ease with which a calf by that sire will be born), a second, maternal Calving Ease (mCE%) figure indicates the ease with which a daughter of that sire is expected to calve.

O Man scores well here too, with a better-than-average mCE% of +0.5.

Morningview Legend holds firm in third place, with good all-round production, health and fitness, while Via Thelo makes his debut in the top 10, with a strong performance in longevity and daughter Fertility Index.

The first and only bull that is not an O Man bloodline to contribute to the top 10 comes in the form of well-know second-crop sire Braedale Goldwyn. Now with almost 2,000 UK daughters contributing to his proof, he has the highest type score of the leading PLI bulls.

The highest new UK-proven bulls are Woodmarsh Talisman (a Talent son from the well-know Mtoto Melody family) and Cogent Loaded (a son of Titanic from Tugolo Looking, also the dam of the proven Cogent Loader).

Talisman has a good all round proof with the right emphasis on all of the fitness traits, particularly Fertility Index at 4.2. His PLI is £148 and Type Merit is 2.1.

Willy was interested to see how the new calving ease indexes would affect the rankings.

"It's an extremely useful tool, obviously, but clearly breeding has already been moving in the direction of calving ease since the top sires already score well and haven't been particularly affected as a result of this introduction.

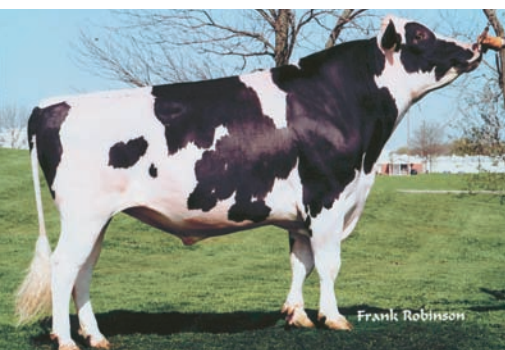

"So good news for producers all round. Genetics are already moving in a way that sees calving ease and fertility improvements, making the indexes valuable tools for the future."

Willy is hoping to see more movement in the April proof run: "It's unusual for January's run to be so uneventful. Yes, there's been a fair bit of re-ranking lower down, but nothing of note in the top 60 – just a little shuffling around."

"O Man certainly has staying power and everyone I speak to who is milking his daughters is pleased with them – without exception.

"He's coming up with the goods, time and time again. And the table shows that. You can't really argue with the figures." |
