

Speerpunt Ecosystem & Landscape Services (SELS) KB1 Symposium 17 January 2008

Dolf de Groot *Environmental Systems Analysis Group*
Jeroen Veraart/Jolande Termorshuizen (*Alterra*) + Linda Scholten (*ESA/Alterra*)

KbG: Rob Bugter, Cees Kwakernaak, Joke Luttk, Roel Jongeneel, Peter vd Meer, Herbert Diemont

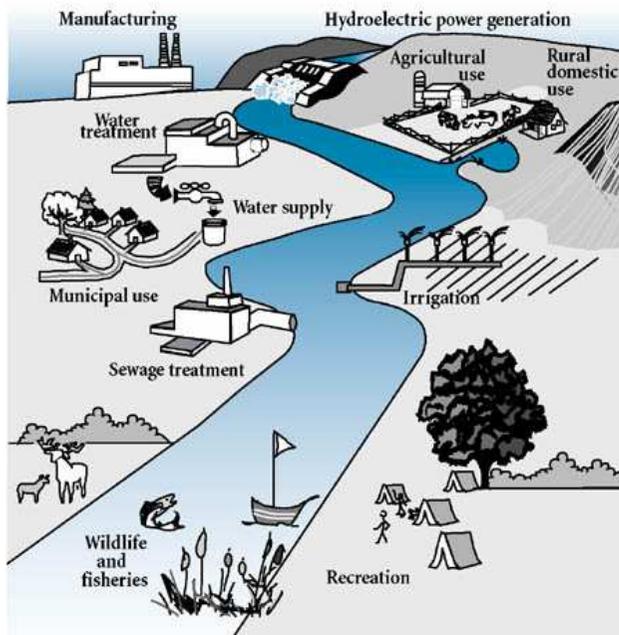

“The objective is to clearly define **common questions**, to identify opportunities for academic and professional **synergies** and translate them to **action points**, and to produce an overview of topics that belong to WUR field of expertise, but are **currently not being [well] developed in research**”
-> new/innovative research (address policy questions of tomorrow ...)

WAGENINGEN UNIVERSITY
WAGENINGEN UR

'Speerpunt' Ecosystem and Landscape Services (SELS)

SELS is a **long-term** research program aimed at **developing knowledge** about quantifying, evaluating and financing **ecosystem and landscapes services** and to implement this knowledge in **integrated local planning, landscape design and management**

Some key questions

- How to translate **ecosystem/landscape properties** into functions, goods & services
- How to **value** ecosystem/landscape services ?
- How to balance **trade-offs** in the use of ecosystem/landscape services in space and time ?
- How can ecosystem services be taken into account in landscape **planning & management** ?
- Which **financing instruments** are most suited to stimulate / achieve sustainable use of ecosystem /landscape services ?
- How **Communicate & Visualise** Ecosystem & Landscape services ?

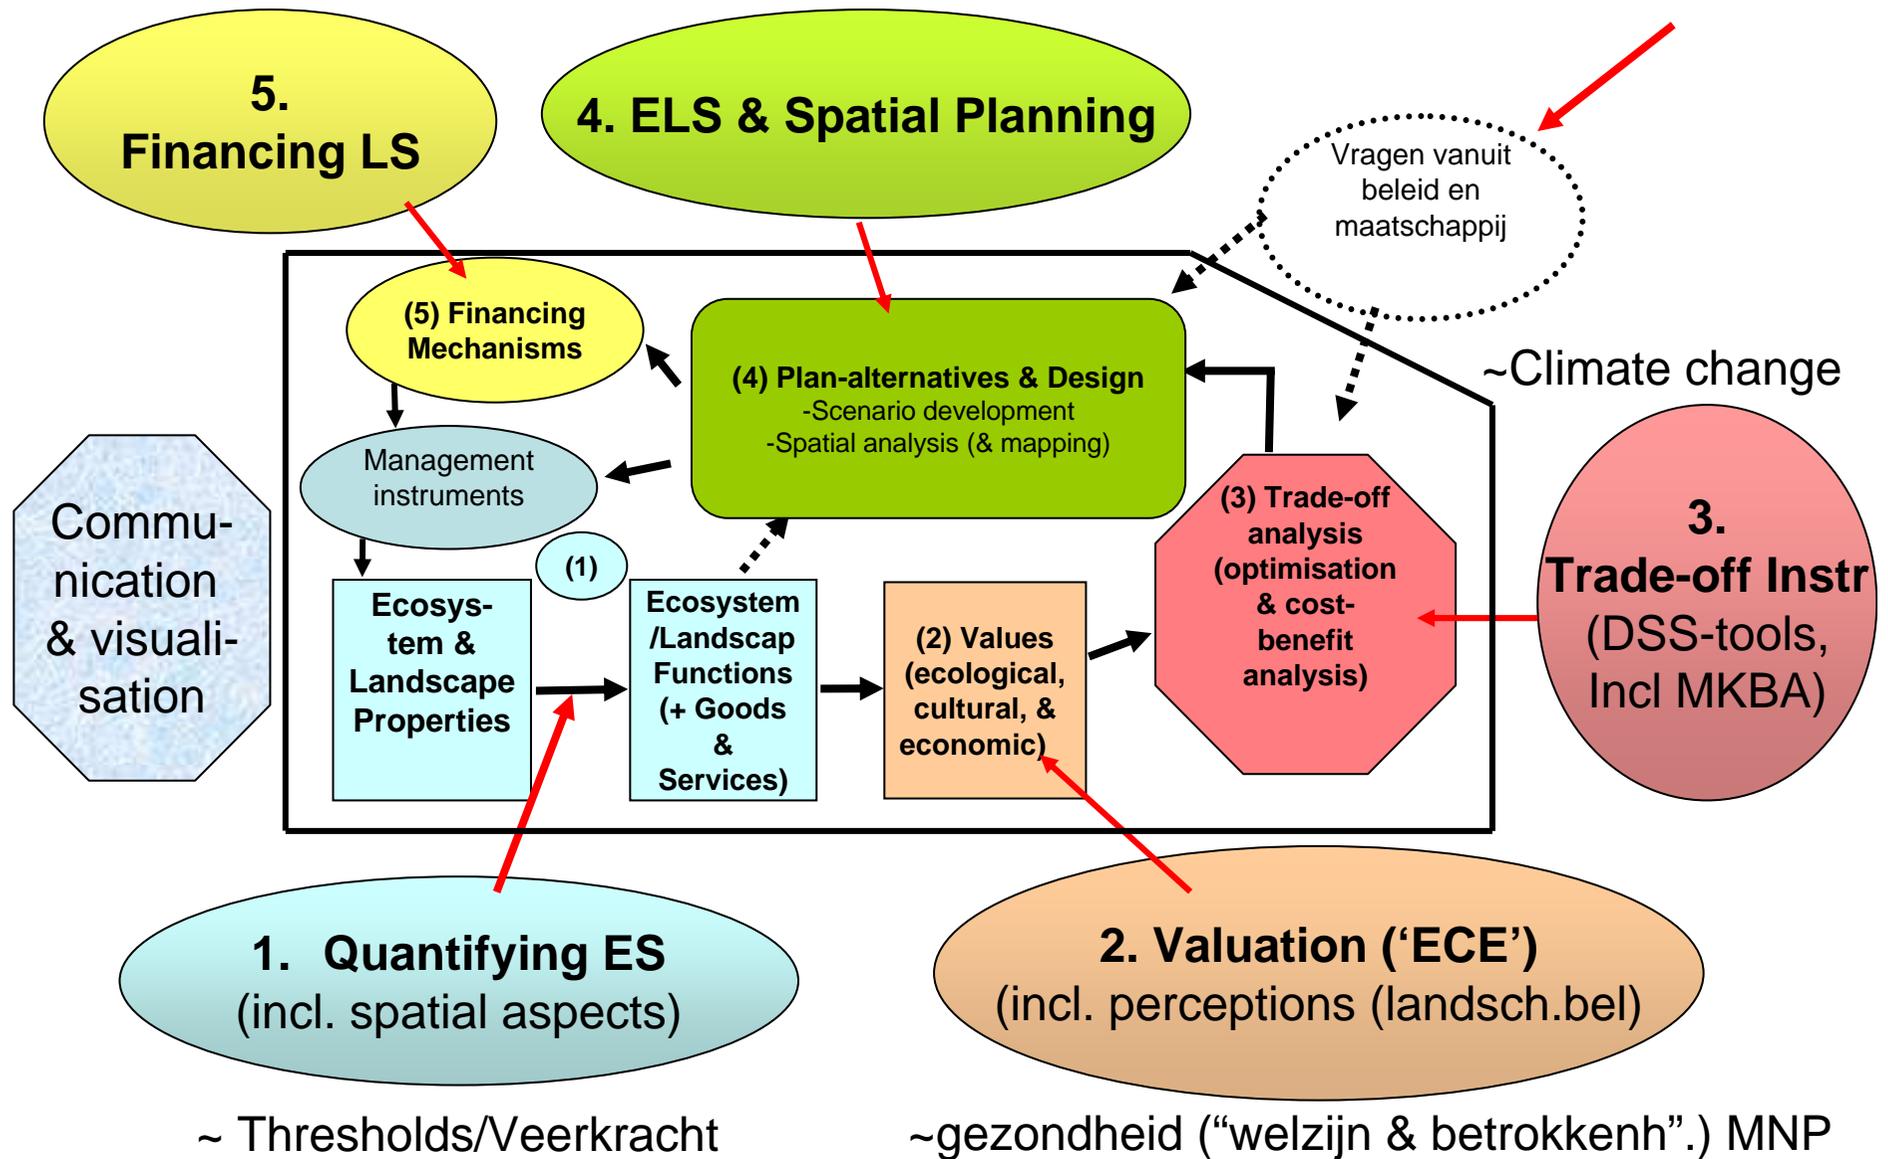

How decide on optimal allocation and design of landscape/ecosystem functions & services ?

SELS Aims:

- 1) To support & stimulate **innovative research** leading to int. recognized contributions to the scientific literature
- 2) Develop (new) **concepts, tools & guidelines** on application of E&LS in planning, management and decision making.
- 3) To develop **financing mechanisms** for sust.multi-functional use (how to “turn value into real money” e.g Payments for Ecosystem Services)
- 4) To develop **practical indicators to monitor change** in landscape services and values (eg. for the MNP Milieu- en Natuurcompendium)
- 5) To develop innovative tools to better **communicate & visualise** E&LS (eg. Web-based data bases and assessment instruments (eg. ARIES)
- 6) To provide a **platform** for information-exchange and **internal collaboration and** increase **external visibility** of the WUR-E&LS work (& facilitate communication with policy-makers and potential “clients”/ joint proposals)

SELS Approach & Themes

SELS THEMES & PROJECTS

Theme-subject	KB Contact	Projects
Theme 1: Identifying and quantifying ecosystem and landscape functions	Rob Bugter	1? + 5 ?
Theme 2: Values and perceptions of Ecosystem & Landscape Services	Joke Luttik	1? + 4 ?
Theme 3: E&LS in trade-off analysis and decision-making	Roel Jongeneel	1 + 2 ?
Theme 4: E&LS in planning, management, and design	Peter vd Meer	1 + 3 ?
Theme 5: Financing Instruments for sustainable use of E&LS	Herbert Diemont	1 + 4 ?

5 + 18 ?

Pilot Case: NLP “Groene Woud”

Pilot Case National Landscape “Groene Woud”

Small-scale landscape with many
functions and (historical) values

Carla Grashof en Joost Tersteeg

+ PhD-trajectories (*not necessarily in “Groene Woud”*)

**(E)Valuating spatial adaptation strategies in response to long term
climate change related water scarcity** (*Jeroen Veraart*) – Theme 3

Landscape services as a spatial planning concept (*Jolande
Termorshuizen*) Theme 4

**Conditionality in financing mechanisms:”if services aren’t delivered,
people won’t pay** (*Gerdien Meijerink*) – Theme 5

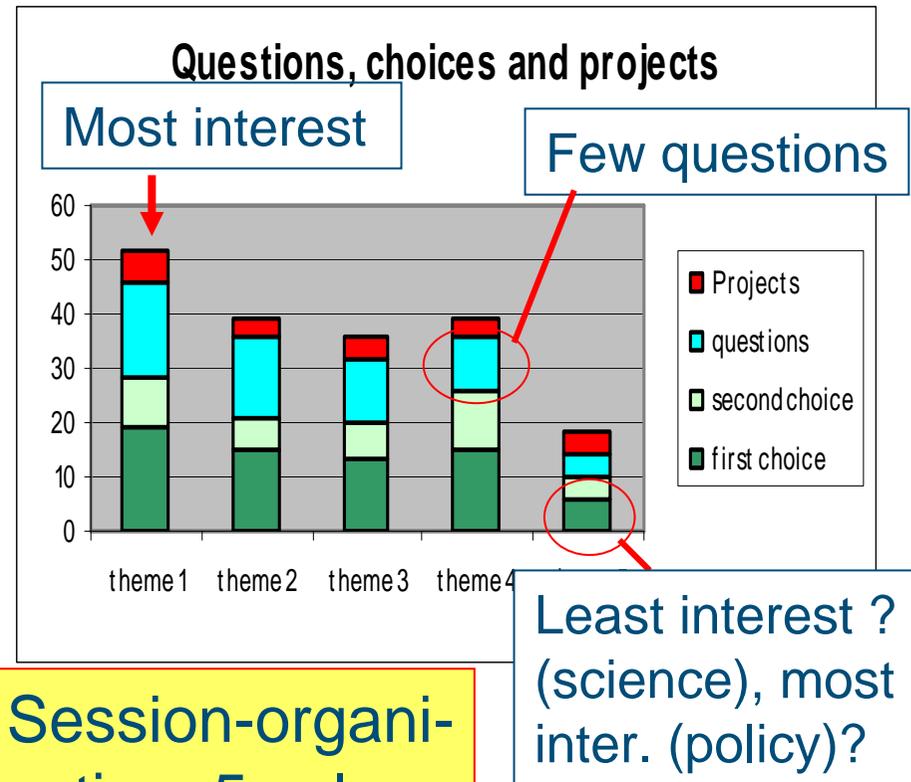

8 November 2007 symposium

Identify “key questions” & missing topics: i.e. what should SELS focus on in the coming years (from science & policy perspective)

Key questions identified by Steering group / from literature / your input

	Vote
How can the relationships between landscape and ecosystem characteristics and their functions and associated goods and services be quantified? [link with Rubicode]	3
What is the effect of dynamic conditions (temporal and spatial) on services, in terms of sustainability and resilience? [link met Rubicode en Speerpunt Veerkracht]	1
What are possible critical thresholds of these relationships ? [Link Veerkracht]	5
How can these relationships and the relevant dynamic interactions be modelled ? [Costanza/MIMES]	2
What is the spatial distribution of, and interactions between functions and how can they be mapped ? [EEF-US, CI, IUCN, IALE]	4
etc	etc

-> hand-in at the end of the session

Session-organisation: 5 colors

Theme 1 =17, 2=14, 3=15, 4=15, 5=9

Selection procedure SELS contribution to research projects

Received **24 proposals**, total 2 million Euro ...

Meeting KlbGroup 20 nov -> **reduced to 18** (fitting in SELS + budget)

Still budget much too high (ca 1 million, **available means ca 480k**)
-> on average 50% funding; asked project leaders if this would be possible
(eg. adjust/reduce RQ / carry out in phases /get co-funding/other solutions)
Most responded positive

Today:

- 1) Several presentations on some of these 18 projects
- 2) Agree on key questions** (handout + brochure) / panel discussions

Further procedure:

- Next week: final check/review by SELS Klankbord-groep
(fit in SELS [RQ], Quality/Realistic, Scientific & Social Relevance,)
- Advice to KB1/2 leaders before Febr. 1
- Final decision: early February [*optimistic scenario*]

Program of today

- 13:15: **Wim Heijman**: linking social, economic and ecological systems in the countryside: management practices and landscape planning for building rural resilience
- 13:35: **SELS Research Themes and Projects** (by project leaders)
Several short presentations per theme followed by **Panel Discussion**
- 15:00 **“Outreach”**: how visualise and communicate E&L services and values
Surprise speaker [me]
+ Leon Braat (new project & new SELS co-manager)
- 15:15 **Final Discussion** and formulation of **Action Points**
- 15:30 Closing

Questions / suggestions ?

13:15: **Wim Heijman (15-20 min)**

“linking social, economic and ecological systems in the countryside: management practices and landscape planning for building rural resilience’ – **RITA Model**

Theme 1: Identifying and Quantifying Ecosystem & Landscape Functions and Services

Key questions:

- How can relationships between landscape and ecosystem characteristics and their functions and associated goods and services be identified and quantified ?
- What is the spatial distribution of E&L functions and how can they be mapped ?
- What is the effect of dynamic conditions (spatial and temporal) on services in terms of sustainability and resilience ?
- What are possible critical thresholds for ecosystem resilience and sustainability ?
- How can interactions between E&L functions and services be modelled ?
- How can the issue of resilience be applied to rural systems and landscapes ?

Theme 1: Identifying and Quantifying Ecosystem & Landscape Functions and Services

Projects proposed for (co) funding by SELS:

- PhD candidate vacancy
- RUBICODE: Rationalizing biodiversity conservation in dynamic ecosystems (**R. Bugter**)
- Pest control as landscape service (**H. Baveco**)
- Ecosystem services: Soil (P. de Ruiter)
- Services of multifunctional wetlands (A. vd Werf)
- The influence of green features on air quality (**A.Oosterbaan**)
- Vloeiproces van een stroomgebied (Wolfert & Corporaal)

Theme 2: Values and Perceptions of Ecosystem and Landscape Services

Key questions:

- What are the most appropriate economic and social valuation methods for ecosystem and landscape services, including the role and perceptions of stakeholders ?
- How to make economic and social valuation of landscape and ecosystem services consistent and comparable ?
- How can standardized indicators (e.g. as in the “Kentallenboek”) help to determine the value of E&LS and how can aggregation steps be dealt with?
- How can the health benefits of nature/green space in an urban residential context be quantified and assessed ?
- How can values be captured “spatially” (eg. through mapping) to address scaling issues and facilitate the use of E&LS in (spatial) landscape planning and decision-making ?
- What are the main bottlenecks in data availability and reliability and how can they be overcome ?

Theme 2: Values and Perceptions of Ecosystem and Landscape Services

Projects proposed for (co) funding by SELS:

- PhD candidate vacancy
- Nature benefits of Natura 2000 (M. v Wijk & W. Wamelink)
- Aggregation of benefits (A. de Blaeij & M. vd Heide)
- European data base for landscape preferences (**Martin Goossen**, H. Meeuwssen and D. Wascher)
- Development and refinement of BelevingsGIS (**Sjerp de Vries**)
- *Waarde groene kwaliteit voor bedrijven* (**Joke Luttik** & P.Veer)

Theme 3: Ecosystem and Landscape Services in Trade-off Analysis and Decision making

Key questions:

- How can information on E&LS be better included in project evaluation methods (such as EIA, CBA and MCA) ?
- How can the costs and benefits of changes in E&LS and values, in time and space, be taken into account, including discounting and cost-effectiveness issues ?
- How can analytical and participatory methods be combined to enable effective participatory policy and decision making dialogues ? [MCDA, RITA, ARIES] ?
- How to select and involve stakeholders in trade-off analysis and what conditions make knowledge about E&LS applicable ?
- How to communicate and visualise knowledge about ecosystem and landscape services and values, and the relevant uncertainties, to the various stakeholder groups ?

Theme 3: Ecosystem and Landscape Services in Trade-off Analysis and Decision making

Projects proposed for (co) funding by SELS:

- PhD: Effectiveness of climate adaptation strategies in coastal zones (& use in DSS tools such as MKBA) (**J. Veraart**)
- *Develop integrated cost - benefit analysis method (monetary and non monetary) for changes in landscape functions and services (V.Tassone/ **Dolf de Groot** – 2007/follow-up?)*
- Cost – benefit analysis of climate change: coping with risk, uncertainties and preference-changes (R. Jongeneel & K. v Kooten)

Theme 4: Ecosystem and Landscape Services in Planning, Management and Design

Key questions:

- How can the concept of E&LS be applied to target setting, design and negotiation in spatial planning processes ?
- What planning and design guidelines need to be developed for green spaces in new urban residential areas to take the health benefits provided by E&LS into account ?
- How can spatial indicators and ecological cartography be used as analytic tools within the spatial planning context ?
- How can E&LS values be included in stakeholder based analysis and participatory decision making processes ?
- How can the concept of E&LS be better communicated to the relevant users ?

Theme 4: Ecosystem and Landscape Services in Planning, Management and Design

Projects proposed for (co) funding by SELS:

- PhD Landscape services as a spatial planning concept (J. **Termorshuizen**)
- Linking social, economic and ecological systems in the countryside: landscape management and design for building rural resilience (**W.Heijman**, P. Opdam, M. vd Heide and vacancy)
- Ecosystem services of green – blue networks in participative landscape planning (**W. Geertsema** & E. Steingrover)
- Optimizing multi-functional use of forests (**P. vd Meer**)

Theme 5: Financing Instruments for Sustainable Use of Landscape and Ecosystem Services

Key questions:

- Which financing instruments and requirements are needed to attract public and private investments in green quality ?
- What are the transaction costs? What costs should be included? Who should pay for these costs ?
- How to identify and quantify the costs and benefits of investments in E&LS, taking into account the distribution of these costs and benefits spatially and temporally, as well as among the various stakeholders ?
- How to structurally promote the implementation of financing instruments (for example by bringing together the supply and demand of services) ?
- How to involve beneficiaries into payments for ecosystem and landscape services ?

Theme 5: Financing Instruments for Sustainable Use of Landscape and Ecosystem Services

Projects proposed for (co) funding by SELS:

- PhD Institutional aspects of financing mechanisms (PES) (G. Meijerink)
- Continued research for Rural European Platform (H **Diemont**)
- Biorights financial systems for capturing PES in poor rural regions (H. **Diemont**)
- Costs and benefits of nature management (J. v Raffe & M. v Wijk)
- Funding for Nature and Landscape: Benchmarking (A. Gaaff and R. Smidt)
- Marketing of non-marketed forest products and services (M. v Wijk, M. vd Heide, G. Meijerink)

15:00 Outreach (visualising & communicating ES)

How communicate results of SELS to general public and decision makers ?

-> several **Key Questions** indicated the importance:

- How can the concept of E&LS be better **communicated** to the relevant users (Theme 4)
- How to communicate and **visualise** knowledge about ecosystem and landscape services and values, and the relevant uncertainties, to the various stakeholder Groups ? (Theme 3)
- How can standardized **indicators** (e.g. as in the “Kentallenboek”) help to determine the value of E&LS ?(Theme 2) + **perceptions** & involvement **stakeholders** (Thema1)
- How to structurally **promote** the implementation of financing instruments (Theme 5)

- Development and refinement of BelevingsGIS (**Sjerp de Vries**)
- European data base for landscape preferences + website (**Martin Goossen, et al**)
- Elements in other projects

+ input in MNP – Natuurbalans, Milieu & Natuurcompendium

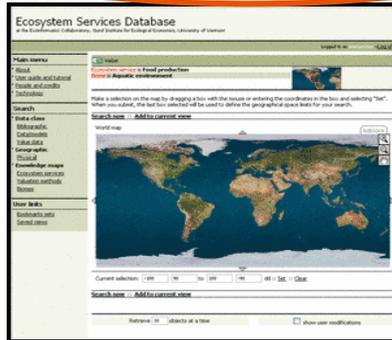

“Putting Ecosystem Services on the Map”

Conservation International
- EcoServices Mapping

SELS

Ecosystem Services
Data base (UVM) +
NV&F/FSD Case Base

Ramsar Data base
Wetlands International

“Digital or Virtual Earth Project” Conservation commons Initiative
(www.conservationcommons.org) IUCN Canada + WCMC-UK + CI + Microsoft

& RSPB-UK & IUCN-NC
(E4E ↔ Google Earth)

IUCN Commission on Ecosystem Management
-> CEM workshop Barcelona (WCC Oct. 2008)
“Mapping & Visualising Ecosystem Services”

Several WUR projects: SELS co-funded (eg RITA + SENSOR (CLUE), others ..
⇒ SELS can help to bring WUR projects together and link with international efforts

ARIES Assessment and Research Infrastructure for Ecosystem Services (NSF 925.000 US\$ (2007-2010) Ferdinando Villa (IEE-UVM))

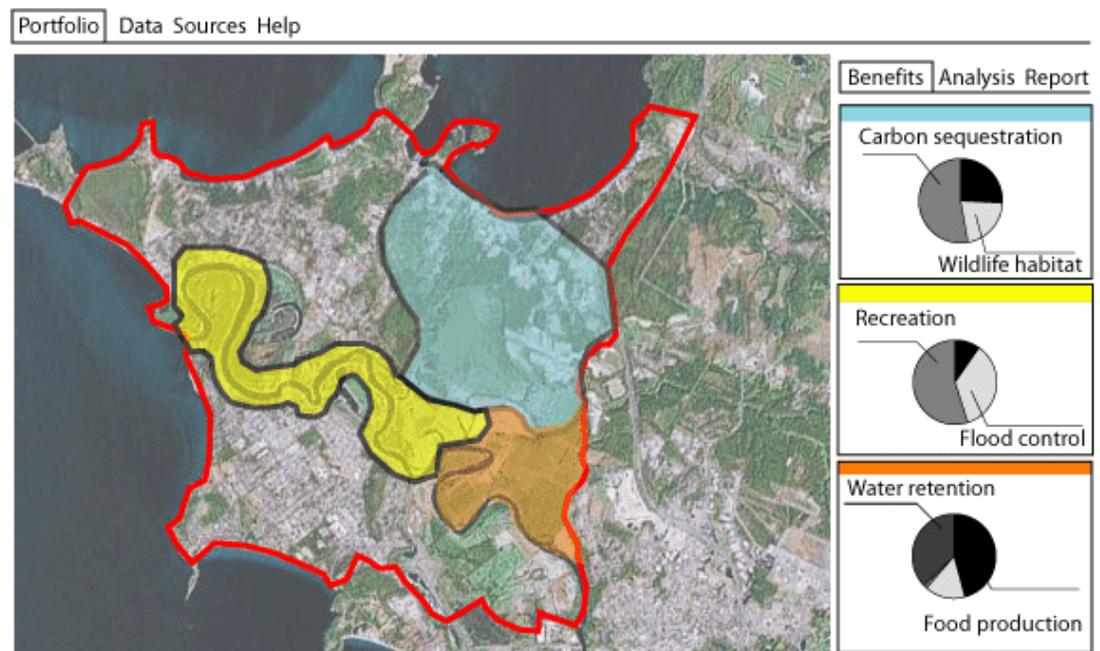

ARIES is a web-based technology for rapid ecosystem service assessment and valuation to **make environmental decisions easier and more effective**. ARIES helps discover, understand, and quantify environmental assets and what factors influence their values, in a geographical area and according to needs and priorities set by its users.

What users can do with ARIES

ARIES can accommodate a range of different use **scenarios**, incl. spatial assessments and **economic valuations** of ecosystem services, optimization of **payment schemes** for ecosystem services, and **spatial policy planning**

Artificial Intelligence in ARIES

ARIES uses “**intelligent**” software agents to retrieve, analyze, and synthesize knowledge (prototype ready fall 2008)

Current Partners include Conservation International, Earth Economics, and **Wageningen University (ESA)**. Contact ecoinformatics@uvm.edu.

Questions ?

Dr. Leon Braat
Senior Researcher International Nature Policy, Alterra

Project Leader COPI:
Review Economics of Biodiversity Loss: Scoping the Science

Co-manager SELS
(as of today ...)

15:15 Final Discussion &
Formulation of Action Plan

SELS Targets / “Action Points”

- To produce several scientific **articles and a Special Issue**
 - Position-paper on key-questions/Theme (*currently underway*)
 - Special Issue with more in-depth analysis (*planned for autumn*)
 - Individual paper(s) by PhD and other research projects (*ongoing*)
 - To co-finance at least 5 **PhD-projects** to be completed in 2012
(*in collaboration with research schools, esp. WIMEK/SENSE*)
 - Organisation of workshops and **symposia**
 - National Symp: “Investering in (Ned.) landschap loont” (June?)
(*Ism Nature Valuation & Financing Network*)
 - “Dahlem-type” workshop / Special Issue (Nov.?)
 - Practical **tools & guidelines** to incorporate E&LS in planning, management & DM (*eg. RITA, ARIES*) & *visualisation (Google-earth)*
 - To incorporate E&LS in **education** (*curricula and MSc-thesis work*)
 - To have a good functioning **WUR platform on E&LS**
(*a.o. meet 2x/year for afternoon in depth discussion of progress*)
-

Action Points & workplan 2008

- Finalise **selection of projects** asap
- Formulate **PhD-proposals for Theme 1 & 2** (possibly combined with “visualisation”)
- Further develop **case Groene Woud**
- Start-up discussion on **integrative “Project Evaluation Tool(s)”**
(RITA, ARIES, linked to GIS (eg. CLUE-SENSOR), etc.
- Prepare first **“SELS Working Group Progress Meeting”** (to be held in May/June)
= voortgang alle SELS-(co) funded projects
- Start-up organisation of **National Workshop in “Investing in Landscape Services”**
(+ meetings with Min. and other pot. “clients”, eg EU) [in collab. with NV&F Network]
- Start-up organisation of **Dahlem-workshop & Special Issue**
- Organise writing-team meeting for **Position/Review Paper** on SELS
- Further formalise and promote the **SELS Working Group & Platform**

Exploring the potential of nature to improve quality of life

'Speerpunt' Ecosystem and Landscape Services (SELS)

SELS is a long-term research program aimed at improving the understanding of the capacity of ecosystems and landscapes to provide services and quantifying the related benefits - socio-cultural, ecological and economic - at various scales to assist integrated planning, management and decision-making processes.
