This bibliography announces recently published books, reports and papers on land and water development, and related subjects, with special reference to application in developing countries.

The bibliography does not represent a complete review of all recently issued literature. It is a selection made from the acquisitions of the Library of the Staring Building, which serves, in addition to ILRI, the Dutch Institute for Land and Water Management Research, The Netherlands Soil Survey Institute, and several other Government services.

The literature mentioned is available on loan to persons with home addresses in The Netherlands. Those living outside The Netherlands may call upon the Library of the Staring Building for photocopies of shorter articles, which they require for the purposes of research or private study. The charge per page amounts to U.S.\$ 0,20, including surface mail.
