

“Quality Handling” of farm animals

Boivin, X., Ruis, M., Waiblinger, S., Mounaix, B., Windschnurer, I., Coleman, G.

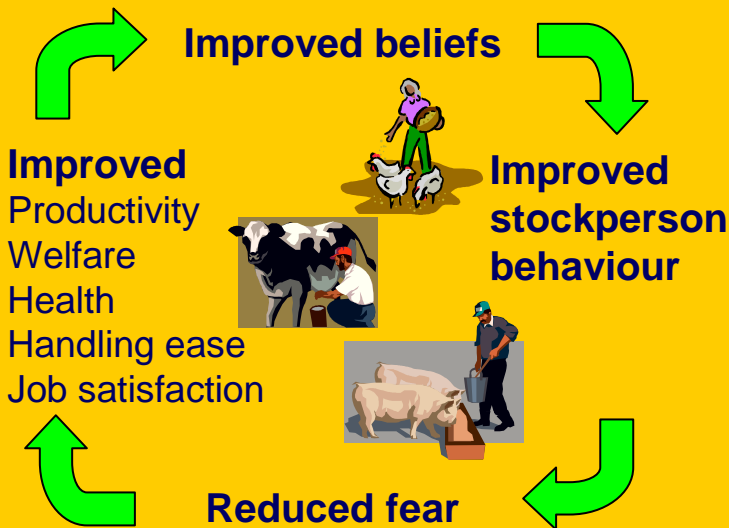

MONASH University

Stockpeople play a vital role in the overall productivity, welfare, behaviour and health of the livestock under their care.

The « **Quality Handling** » training package contains: multimedia program on CD-ROM, group discussions, video's, manuals, powerpoint presentation, posters, newsletters

Based on scientific evidence, « **Quality Handling** » is a new multimedia training method to optimise behaviours of (future) professional stockpeople towards their animals.

Targeting stockpeople attitudes

- Understanding animal's relationship to humans and its effects
- Understanding animal behaviour
- What determines our behaviour towards animals?
- How to overcome habits and maintain behavioural changes?
