

# QUIZ FECAL SCORING SYSTEM

Colour, shape and solidity of excrements say something about an animal, the kind of food it gets and the quality of that food.

Problems can be recognized promptly by a good assessment of feces.

Which animal species and which fecal score belong to the feces shown below?

- 1: Well formed, solid feces.
- 2: Formed feces, but soft.
- 3: Feces are very soft, some texture still present.
- 4: Mixture of formed and unformed, mostly loose.
- 5: Very loose, no form; diarrhoea.
