

Manure Management Improvement Program

Global Agenda of Action/www.livestockdialogue.org

Theun Vellinga, Jac Meijls, Paul Vriesekoop

Focus areas of the Global Agenda of Action
www.livestockdialogue.org

Manure management pertains to all possible interventions along the chain;

- *starting with collection and storage and treatment;*
- *dealing with transport;*
- *ending with land application;*
- *their interacting effects on utilization;*
- *N, P, K, org matter, GHG, other emissions*

Strategic goal Manure Management Improvement Program

- Improved manure management to:
 - improve food security and
 - reduce environmental impact

Operational goals

- Knowledge, inventory and dissemination
- Action plans /pilot projects via public private cooperation

The Manure Management Kiosk: Manure Management Mapping (Wageningen UR with FAO)

- Inventory of current management, methodological innovations
- Quantification effects of improved management

Dissemination:

- E-marketplace for knowledge
- Information exchange
- Training / capacity building

Stakeholders in the public private cooperation:

- Private sector
 - Primary producers: Farmers
 - Suppliers: feed industry, trade
 - Processors: dairy and slaughter industries
 - Extension/service labs
 - Technical sector
- Public sector
- Civil Society
- Academia
- International Organizations
