

# Flspace: Future Internet Business Collaboration Networks in Agri-Food, Transport and Logistics

A.J.M. Beulens <sup>a, b, 1</sup>, C.N. Verdouw <sup>a, b</sup>, J. Wolfert <sup>a, b</sup>

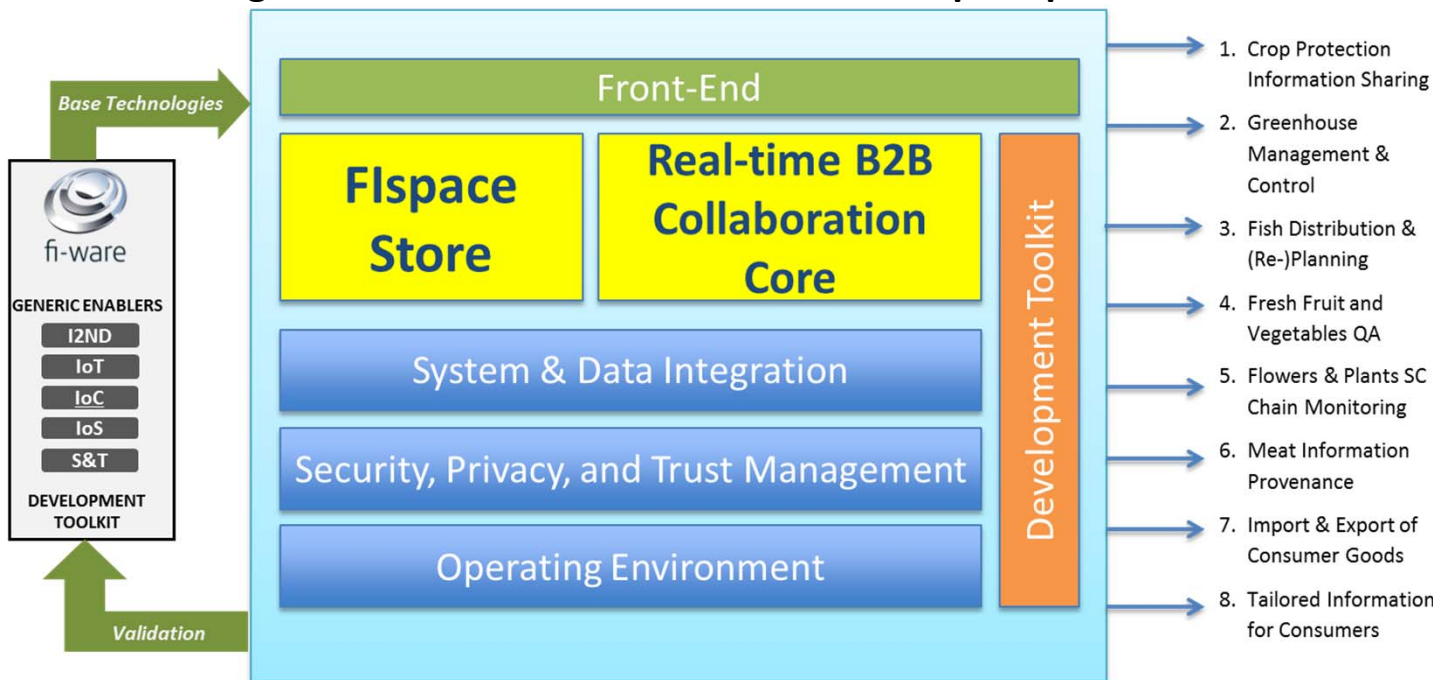

**Abstract** - This presentation introduces a Future Internet platform – called Flspace - for business to business collaboration that is currently being developed within Europe’s Future Internet Public-Private Partnership programme (FI-PPP).

## Flspace will facilitate:

- ... seamless cross-organizational collaboration (information exchange, communication, coordination of activities)
- ...unprecedented transparency, visibility and control of processes (using Internet-connected sensors and IoT devices)
- ...rapid, easy, low cost development and deployment of customized solutions (apps and services)
- ...agile formation of business networks and ecosystems (social networks and app/service markets)

## High-level technical architecture of the Flspace platform
