

Discussie middag “Wat heeft WUR LNV en andere stakeholders te bieden?

“20 November, 2011, Ministry of Agriculture, Nature & Fisheries, 20 November, 2011 The Hague

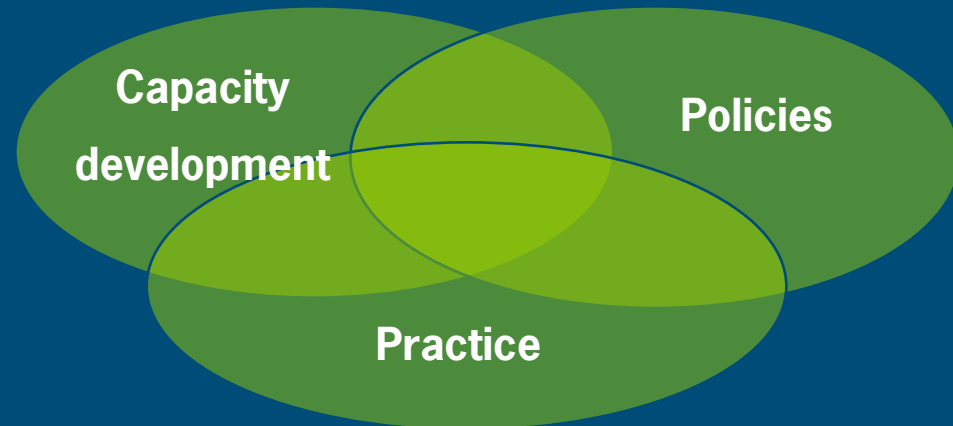

# Capacity development for Water, Food and Ecosystems

Henk Ritzema, Wouter Wolters, Jochen Froebrich  
Esther Koopmanschap and Ingrid Gevers

# Capacity development for Water, Food and Ecosystems

- Need for capacity building
- Capacity building process
- Courses

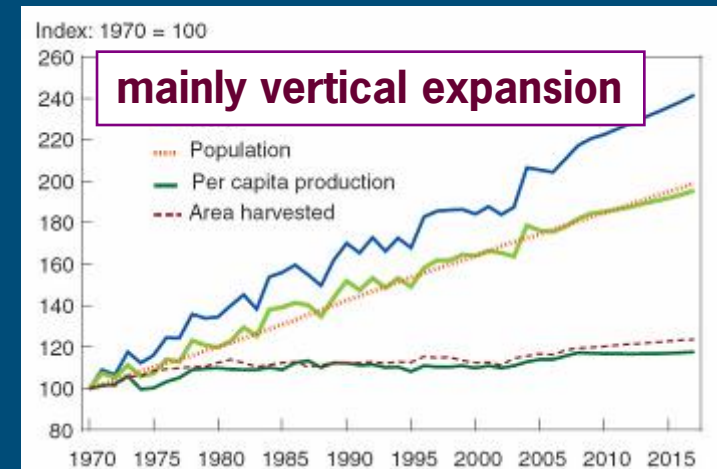

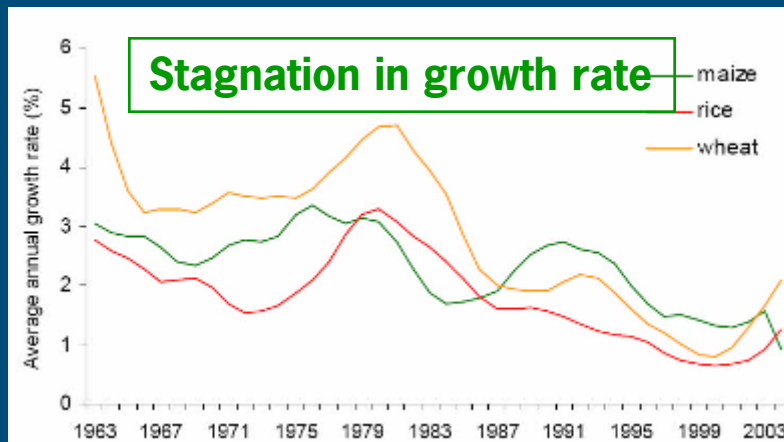

# Need for capacity building

World population 2008: 6,700 million → 2050: 9,200 million

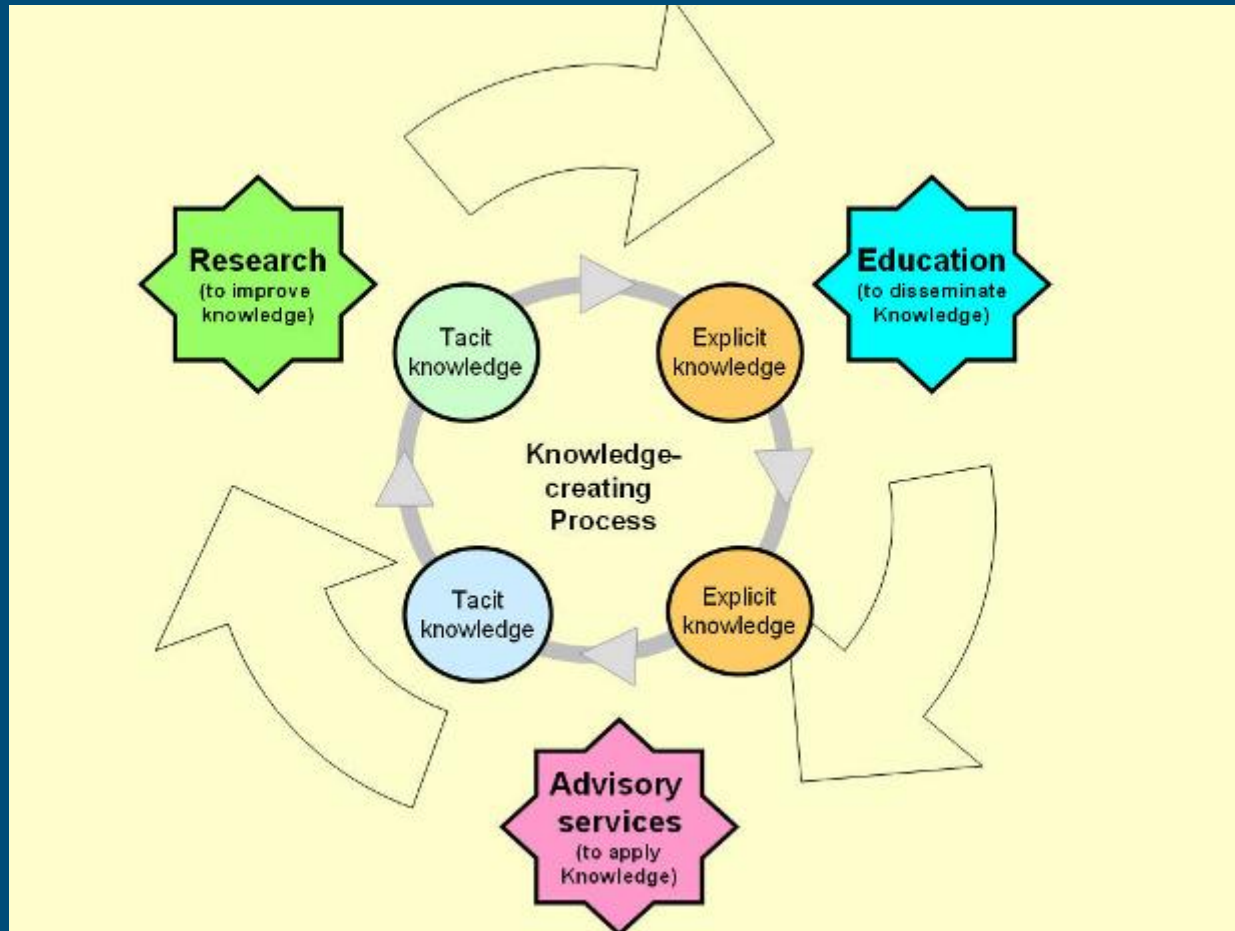

Food production has to double

Millennium ecosystem assessment: agriculture ↔ ecosystems

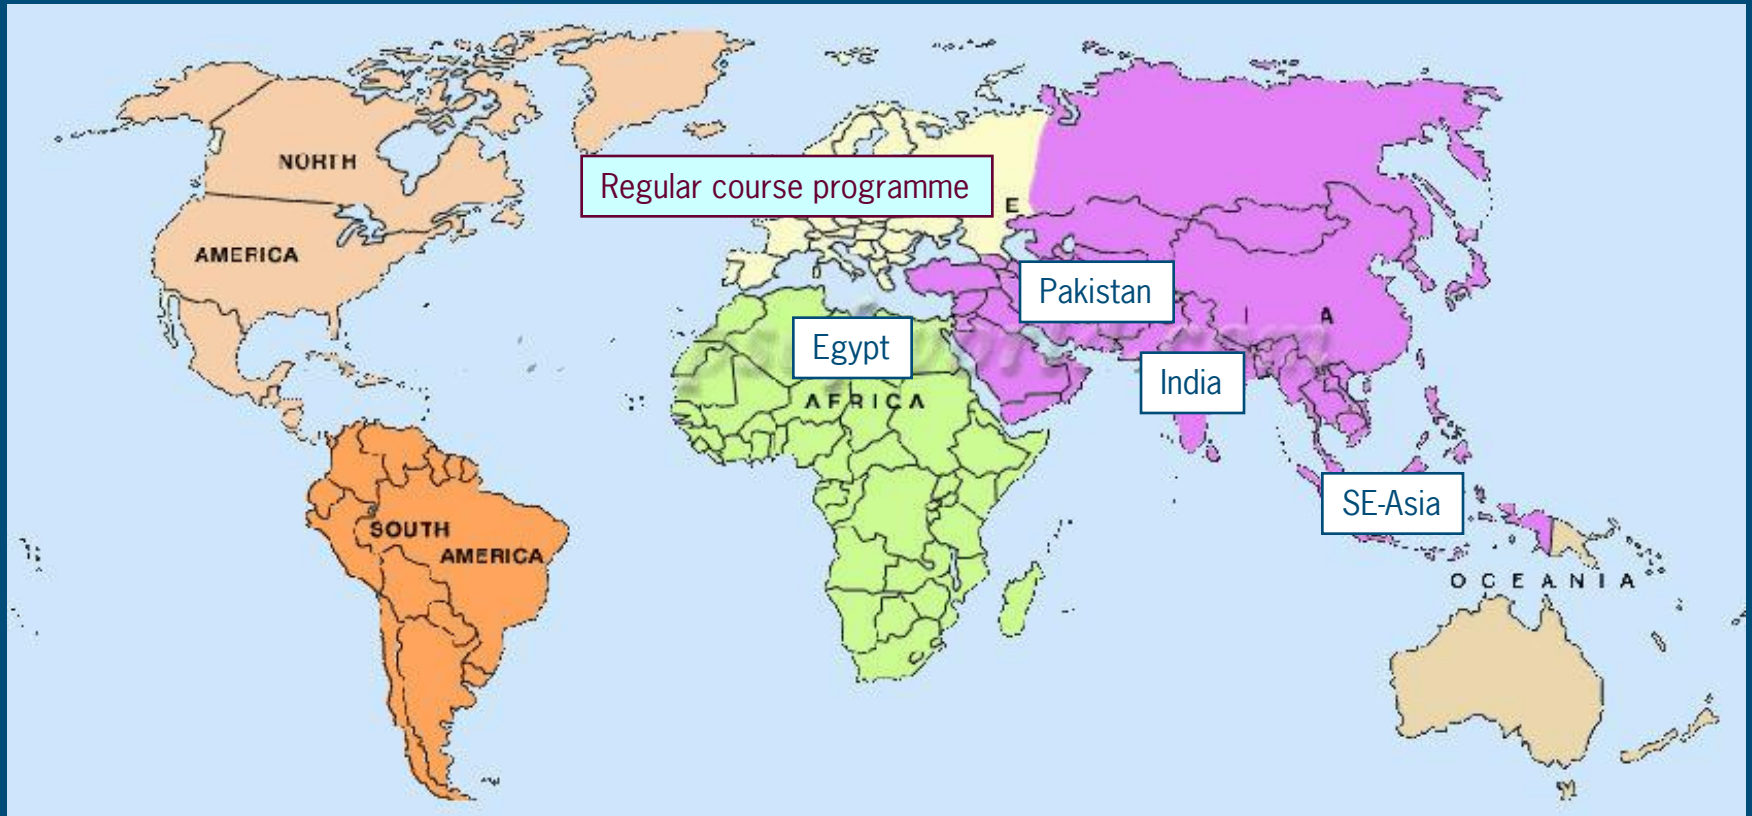

# Capacity building process

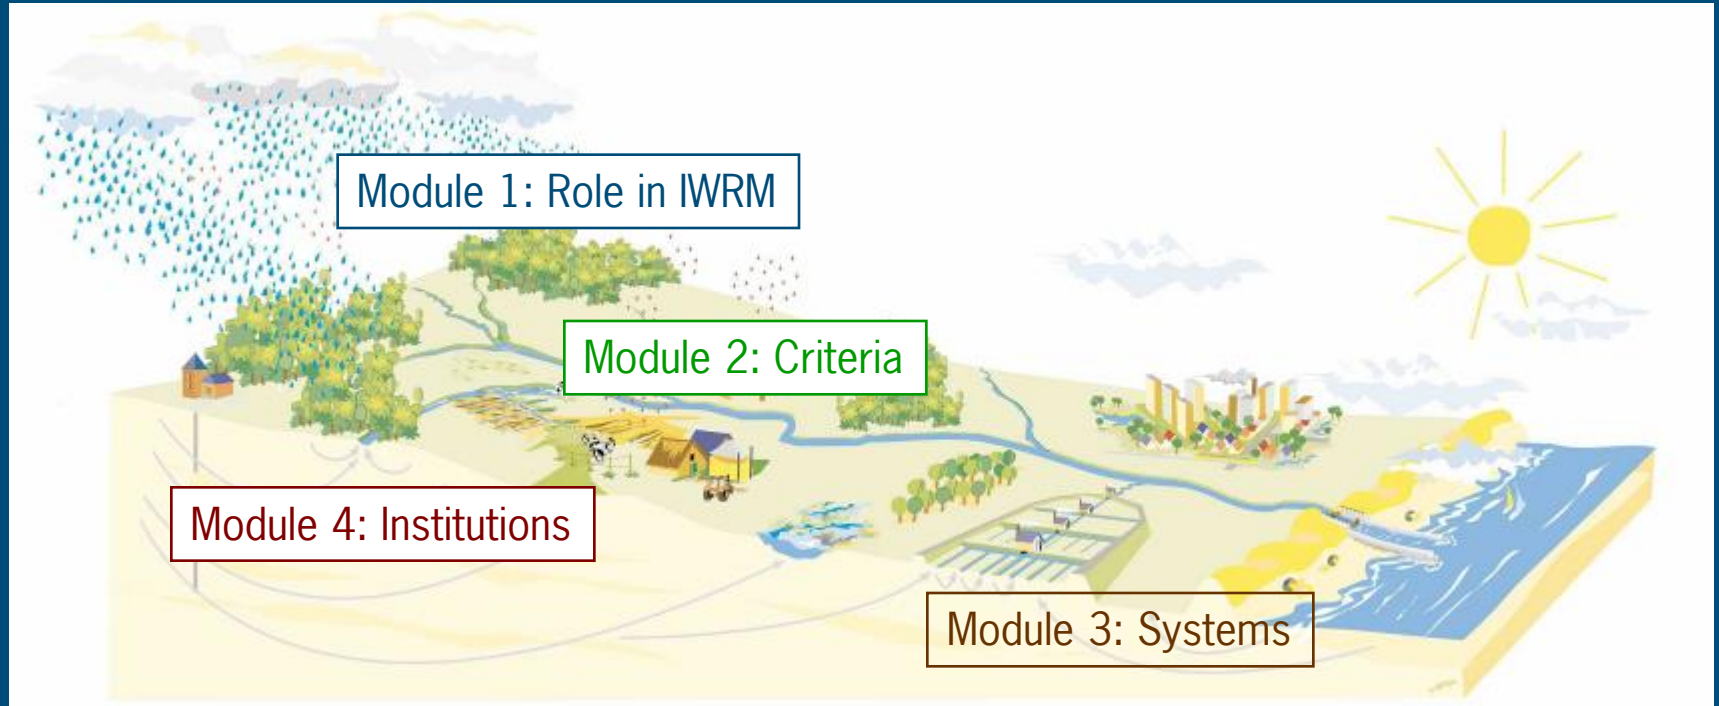

# Capacity building

requires long-term partnerships

# Regular course programme

## International Course on Land Drainage

# Regular course programme

## Proposed changes in 2009

- Adapting to climate change (note : farmers have always adapted their practices)
- Enhance link between research and education
- Enhance link between training and policy-makers

# Capacity development

- Capacity development means putting in place the conditions for change:
  - Enhancing the capabilities of individuals and organisations
  - Supporting multi-stakeholder learning processes
  - Creating an enabling environment to put knowledge and skills into practice

# Link to LNV policy documents

- Policy documents highlight the importance of working with different stakeholders to meet policy objectives
- This requires new capacities and facilitation of processes at the interface of research, policy and practice

# Integrated Land, Water and Biodiversity Management

- Capacity Development examples in support of policy implementation:
  - The BBI project “Towards regional policies for sustainable fisheries for small pelagics in Northwest Africa” supports a process leading to regional coordination and policies for the management
  - Development of a Wetland Centre in Turkey – cooperation in the field of water management
  - PPP West-Africa (fisheries): Knowledge and Information management in fisheries, market access, networking
  - Carpathian Programme: Development of an Ecological Network – linked to EU pre-accession and Natura 2000 implementation

# Integrated Land, Water and Biodiversity Management

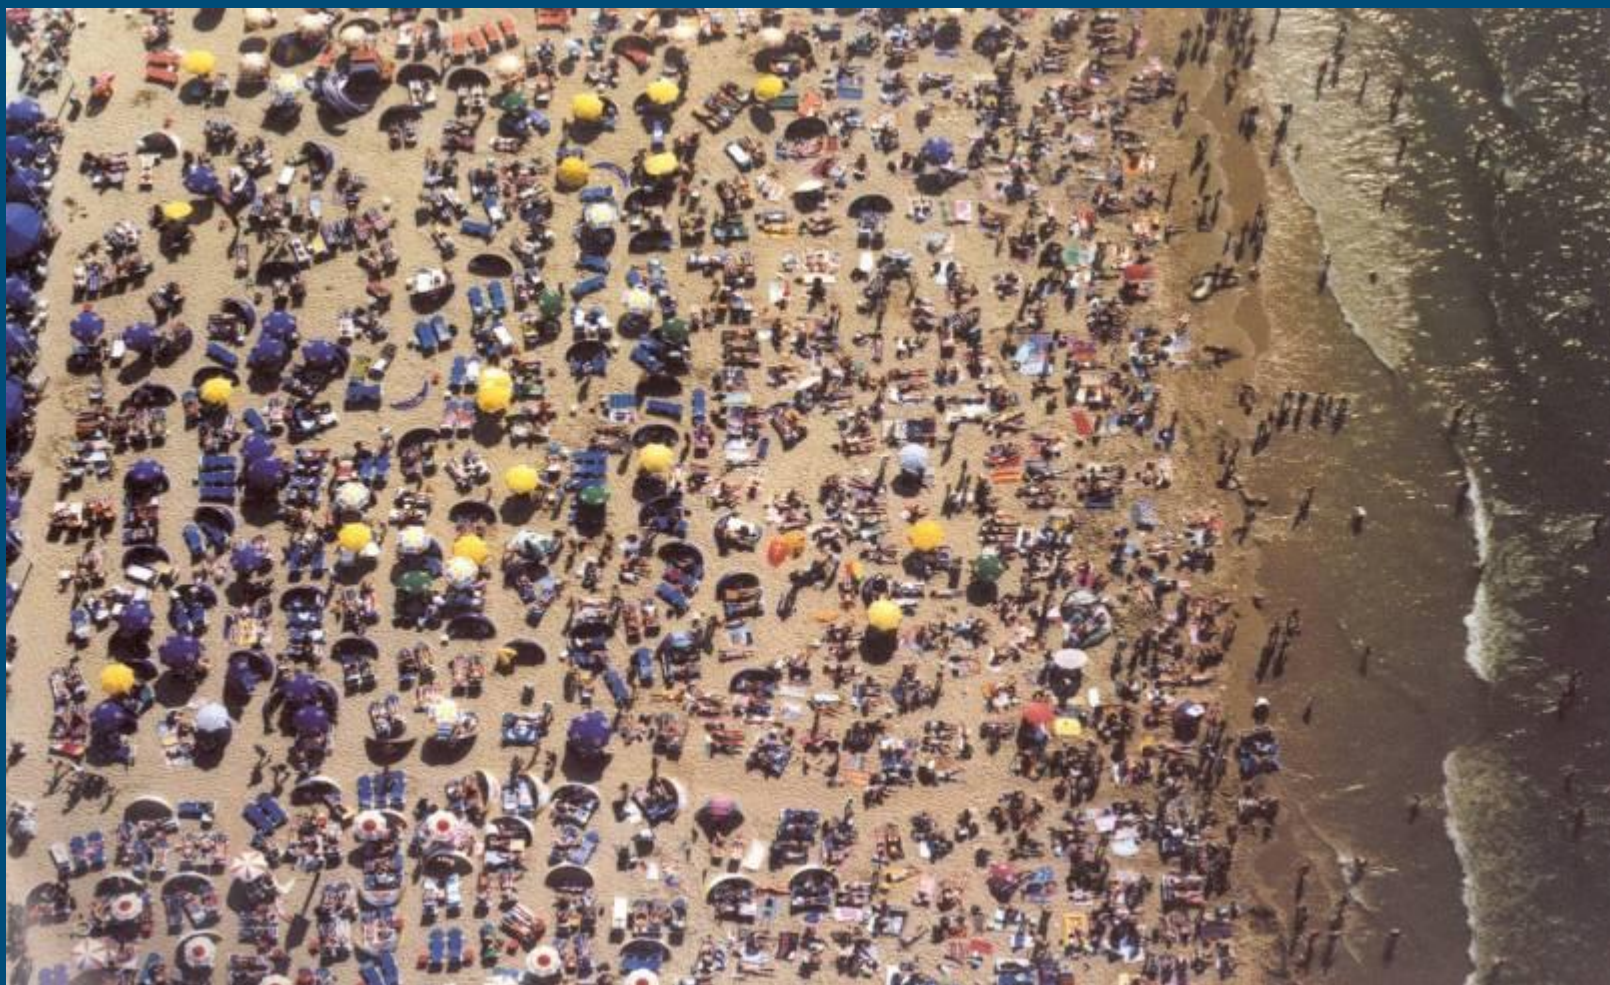

- Capacity Development examples in support of policy implementation (cont'd):
  - Partners for Water Project to develop a Lowland strategy for Indonesia
  - A Ramsar guide for Capacity Development for enhancing wetland wise use
  - Ramsar guidelines for Wetlands and Agriculture

# Short courses on fisheries management

- Objective: learn perspectives on fisheries management and related management tools
- Held annually since 2000 , 160 participants, 35 countries
- Fisheries managers, researchers, staff of universities and NGO's, CBOs

- International Training of Trainers on Wetland Management, a course focusing on the facilitation of multi-stakeholder processes and curriculum development
