

URBAN RESILIENCE

LETS DEBATE!

CARE. ACT. SHARE. LIKE CORDAID.

AF2016 ROTTERDAM

Cordaid  BUILDING FLOURISHING COMMUNITIES

TECHNICAL VERSUS PARTICIPATORY APPROACHES

Yohan versus Martijn

Yohan:

Large scale infrastructure are prestigious projects that don't really meet the needs of communities.
Community based solutions should be the basis for planning.

Martijn:

Bottom-up approach doesn't take large scale and long term developments sufficiently into account.

Cordaid  BUILDING FLOURISHING COMMUNITIES

RESILIENCE - WHAT KIND OF PROJECTS DO WE NEED

Martijn versus Recti

We want people to be safe, protected and secure. We can't prevent another typhoon, but we want to minimize the impact and make sure people can recover their livelihoods fast and better

Martijn:

Integrated urban planning or large scale infrastructure projects are complicated as it is, we need to do it step by step.

Cordaid  BUILDING FLOURISHING COMMUNITIES

FINANCING

Recti versus Yohan

Recti:

Communities must be part of planning and implementation, but this takes time and resources. Who pays?

Yohan:

Local government is responsible for developing resilient cities.
