

Measuring resilience of adaptation interventions and beyond

Session SP 8.11, Risk assessment, adaptation planning and evaluation stream

Thursday 12 May 2016, 08.45 - 10.30, Diamond Room I

Chaired by Ms. Anna Viggh
Senior Evaluation Officer

Organized by Mr. Dennis Bours
Evaluation Officer

Global Environment Facility's Independent Evaluation Office (GEF IEO)

Mr. Anand Patwardhan

Scientific and Technical Advisory Panel
of the Global Environment Facility (STAP GEF), USA

Adviser on adaptation with a particular interest in diffusion and adoption of clean technology and broader issues of science, technology and innovation policy.

PhD in Engineering and Public Policy, Carnegie Mellon University.

Presentation title: Approaches and indicators for measuring adaptation and resilience, including process indicators, linking across scale and applications of the Resilience, Adaptation Pathways and Transformation Assessment (RAPTA) Framework

Mr. Nathan Engle

The World Bank, Climate Change Policy Team, USA

Climate change specialist involved with efforts to integrate resilience into World Bank strategies and operations.

PhD in Natural Resources & Environment, University of Michigan.

Presentation title: Monitoring and evaluation of resilience at the project level

Mr. Lindsey Jones

Overseas Development Institute (ODI), United Kingdom

ODI Research Fellow, working on issues of climate change, adaptation and development.

MSc in Environmental Policy, University of Oxford.

Presentation title: Measuring subjective resilience, outlining a complementary approach to resilience measurement

Mr. Patrick Pringle

UK Climate Impacts Programme (UKCIP), United Kingdom

Deputy Director, working on climate adaptation and disaster risk reduction, with a particular interest in M&E.

MSc Climate Change and International Development,
University of East Anglia

Presentation title: Transformational adaptation to address systemic, fundamental changes through experimentation, innovation and learning histories
