Linking local to global actors and responsibilities

Monitoring, evaluation, and learning focus at different scales

Leagnar and Bours (2014)

Facilitating ME&L across national to local scales

- Project design
 - Objectives that envision how the project could promote national development plans
 - Outcomes and outputs that facilitate building or reinforcing governance and institutions
- Implementation
 - Product and process indicators
- Follow-up
 - Lessons learned and best practices
 - Scaling up and out

Integrate with national strategies

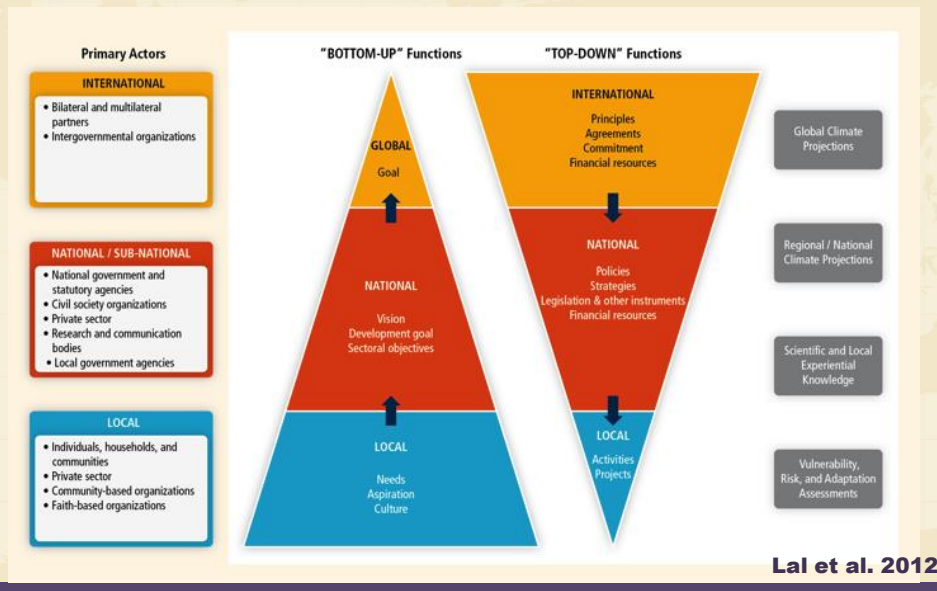

MINISTRY OF HEALTH

Climate Change Strategic Plan for Public Health

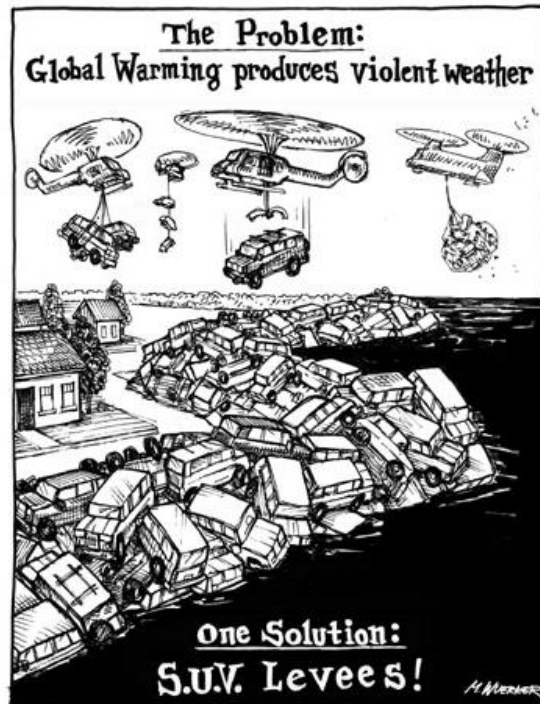

Towards Increased Climate Resilience for Better Health and Well Being of All Cambodian

Health Working Group for Climate Change, September 2012

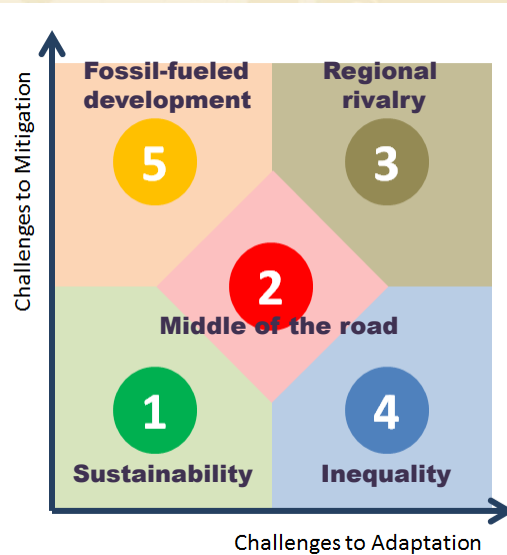

Develop outcomes/outputs that facilitate building or reinforcing governance and institutions linkages

Address the tension between short-term project-focused objectives and the vision of what an adapted human or natural system could look like in several decades

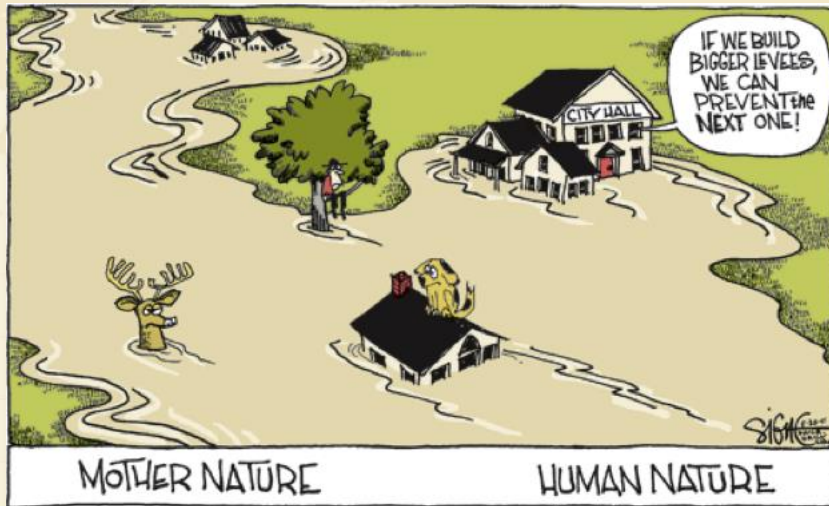

Consider how development pathways could interact with the hazards posed by a changing climate

O'Neill et al. 2015

Indicators: how the project facilitated the process of adaptation

Measure the extent to which the project continues to increase resilience to climate change

ADAPTATION TO SEA LEVEL RISE

Measure the extent to which the project remained a national and international priority

Outreach
