CEO ABZESOLAR S.A.

Christiaan Wallet
Adaptation Futures 2016 Conference
Project manager and co chair of the
steering committee

Cynthia Rosenzweig
Senior research scientist at the NASA
Goddard Institute for Space Studies

Water

In the future countries like
the Netherlands shall play
a key role in bringing fresh
water to developing
nations

<https://youtu.be/lulN44YBcic>

What will the day of a student look like in Rotterdam in 2030?

Food

In the future there will be
global food and water
shortages

I love meat

I will make an effort to eat
less meat, so the next
generation will suffer less
from climate change

<https://youtu.be/sLR1j5ptLoo>

What will the day of a student look like in Rotterdam in 2030?

Transport

Huge infrastructure
changes eliminating the
use of cars in cities will be
present in the Netherlands
in 2030

https://youtu.be/X_I9wBgIDpA

What will the day of a student look like in Rotterdam in 2030?

Energy

Solar panels are a viable
option for energy
production everywhere in
the world
