Management

Smart Horticulture for sustainable cities

June 25-29, 2017

Perth, Western Australia

Symposium themes

To reduce the ecological footprint, conserve scarce resources, promote a more food secure world and to enhance and promote the value of public open space and recreational horticulture, this conference will invite papers that discuss any of the following issues:

- conservation and habitat preservation
- community gardens
- composting and recycling
- direct marketing of fresh and processed horticultural products
- food security
- good agriculture practice
- hydroponics
- intensive horticultural production
- irrigation
- managing remnant bushland
- promoting local foods
- protected cropping
- sustaining and rehabilitating degraded soils
- urban and recreational horticulture in dry arid environments
- water conservation and recycling
- water sensitive urban design

Commission Organic Horticulture

Dr. Martine Dorais, president

Q1 Are you interested to organize a 4th ISHS Symposium on Organic Greenhouse Horticulture ?

Where?

When?

Technical program?

Commission Organic Horticulture

Dr. Martine Dorais, president

Q2 How to keep our group active?

Q3 How to promote our working group?
