PROEFOPZET

In de herfstteelt van 1988 werden 13 nieuwe rassen komkommer op hun gebruikswaarde voor de praktijk beproefd.

Corona, Ventura en Jessica werden als vergelijkingsrassen aan de serie toegevoegd.

De proeven lagen in tweevoud op de bedrijven van:

- Gebr. Schenkeveld, Den Hoorn
- A. v. Winden, Pijnacker
- P.T.G., Naaldwijk
- R.O.C. Noord Nederland, Barger Compasuum

## WAARNEMINGEN

De waarnemingen zijn gedaan door vertegenwoordigers van de deelnemende zaadbedrijven, de tuinders, de N.A.K.G., de gewasspecialist van het Proefstation te Naaldwijk, de voorlichtingsdienst en medewerkers van het Gebruikswaarde-onderzoek.

Tijdens de eerste maal (vroeg) werden er cijfers gegeven voor de gewaseigenschappen:

- groeikracht
- gewasopbouw

en vruchteigenschappen:

- vorm
- kleur
- lengte

Bij de tweede maal werd alleen beoordeeld op de vruchteigenschappen.

De cijfers werden gemotiveerd door opmerkingen.

Op de vier proefplaatsen werd de produktie in kg- en stuks/m<sup>2</sup> bepaald terwijl ook het gemiddeld vruchtgewicht werd berekend.

Bovendien werd het aantal binnenlandse en kromme vruchten geteld en het percentage van het totale aantal stuks berekend en het gewicht aan stek/m<sup>2</sup> bepaald.

De resultaten van het e.e.a. staan in de volgende tabellen.

Toelichting bij de tabellen.

---

|                      |               |                  |
|----------------------|---------------|------------------|
| Cijfers: groeikracht | 4 = zwak      | 8 = te sterk     |
| gewasopbouw          | 4 = slecht    | 8 = zeer goed    |
| vorm                 | 4 = slecht    | 8 = zeer goed    |
| kleur                | 4 = vrij geel | 8 = donker groen |
| lengte               | 4 = te kort   | 8 = te lang      |

O = vergelijkingsras Corona  
P = vergelijkingsras Ventura  
Q = vergelijkingsras Jessica

T = tussentijdse beoordeling  
E = eindbeoordeling

D = Den Hoorn (Gebr. Schenkeveld)  
P = Pijnacker (A. V. Winden)  
N = Naaldwijk (P.T.G.)  
B = Barger Compasuum (R.O.C. Noord Nederland)

Gem. = Gemiddelde van de proefplaatsen.

I en II zijn de verschillende parallellen.

|                  |                 |                     |
|------------------|-----------------|---------------------|
| vroeg: Den Hoorn | 21-07 t/m 03-08 | totaal t/m 22-09-88 |
| Pijnacker        | 25-07 t/m 03-08 | t/m 08-10-88        |
| Naaldwijk        | 29-08 t/m 22-09 | t/m 20-10-88        |
| Barger C.        | 31-08 t/m 12-09 | t/m 31-10-88        |

De teelten in Den Hoorn en Pijnacker waren vroege herfststeelten.  
In Pijnacker had men aan vruchtdunning aan de stam gedaan, in Den Hoorn niet.

Bij het bedrijf in Den Hoorn was men, in verband met trips, genoodzaakt om bij een produktieniveau van +/- 35 stuks te stoppen.

In Naaldwijk zaten knolplekken in de grond. In het algemeen waren de vruchten daar zwak op kleur.

In Barger Compasuum hield men een twee-stengel systeem aan, het gewas stond er goed bij.

Tabel 3. Samenvatting van de beoordeling in cijfers door de commissie bij de tussentijdse beoordeling.

|             | Groeikracht |            |            |    |            | Gewasopbouw |            |            |    |            |

Uw brief van  
Uw kenmerk  
Ons kenmerk HS/LB/88/P  
Onderwerp

Naaldwijk, 27 september 1988

Op 26 september 1988 heeft de beoordelingscommissie het gebruikswaarde-onderzoek bij komkommer gedurende de afgelopen stookteelt besproken en de plannen voor 1989 vastgesteld. Het volgende is naar aanleiding van de genoemde bespreking te melden:

#### Uitslag eerste beoordeling stookteelt 1988

Voor voortgezet onderzoek in 1989 werden de rassen 24-02 van Rijk Zwaan en C445 van de Ruiter goedgekeurd. Deze twee rassen zullen op een flink aantal plaatsen worden beproefd in 1989.

#### Uitslag tweede beoordeling stookteelt 1988

In de tweede beoordeling in 1988 stonden de rassen Elka van Nunhem, 718 en 723 van Rijk Zwaan, Mustang van Bruinsma en de vergelijkingsrassen Corona, Lucindé en Ventura. Het ras Elka zal niet worden aanbevolen. De rassen 718 en 723 zullen niet in het handelsverkeer gebracht worden. De rassen Mustang, Lucinde en Ventura zullen worden aanbevolen. Het vergelijkingsras Corona zal zeer beperkt worden aanbevolen. Binnenkort zullen de resultaten gepubliceerd worden.

#### Tweede beoordeling in 1989

In 1989 zullen rassenproeven tweede beoordeling genomen met de rassen 24-02 en C445. De vergelijkingsrassen zullen Corona, Mustang en Ventura zijn.

#### Eerste beoordeling 1989

Op drie plaatsen, te weten het P.T.G., een praktijkbedrijf te Pijnacker en de proeftuin te Klazienaveen zullen 12 nieuwe rassen van zeven veredelingsbedrijven worden beproefd naast de vergelijkingsrassen Mustang, Corona en Ventura.

Het rassenlijst sortiment voor de stookteelt

Het rassenlijst sortiment van de rassenlijst in 1985, aangevuld met de aanbevolen rassen uit de jaren 1986 t/m 1988 werd door de commissie besproken.

Het aanbevolen sortiment voor de stookteelt ziet er, zoals de commissie dat aanbeveelt, nu als volgt uit.

|         |   |
|---------|---|
| Corona  | B |
| Famosa  | B |
| Lucinde | A |
| Stereo  | B |
| Ventura | A |
| Mustang | N |
| Regina  | B |

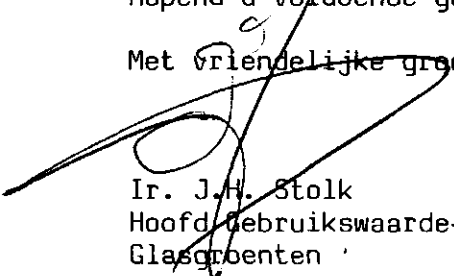

Inzenden van zaad voor de proeven in 1989

Voor de eerste beoordeling kunnen de door u opgegeven rassen worden ingezonden. Per ras is een hoeveelheid van 6 x 50 zaden nodig. Ook van de vergelijkingsrassen Mustang, Corona en Ventura is deze hoeveelheid nodig voor de eerste beoordeling.

Voor de tweede beoordeling kunnen van de goedgekeurde rassen 24-02 en C445 zaden worden ingezonden, alsmede van de vergelijkingsrassen Mustang, Corona en Ventura. Per ras is een hoeveelheid van 20 x 50 zaden nodig. Alle monsters kunnen rechtstreeks naar ondergetekende worden gestuurd, vergezeld van een parallelmonster van 100 zaden voor de N.A.K.G. Het zaad dient 15 oktober a.s. in mijn bezit te zijn.

Hopend u voldoende geïnformeerd te hebben.

Met vriendelijke groeten,

Ir. J.H. Stolk
