

Chemistry at Rotterdam University of Applied Science

ROTTERDAM UNIVERSITY

Organisation:

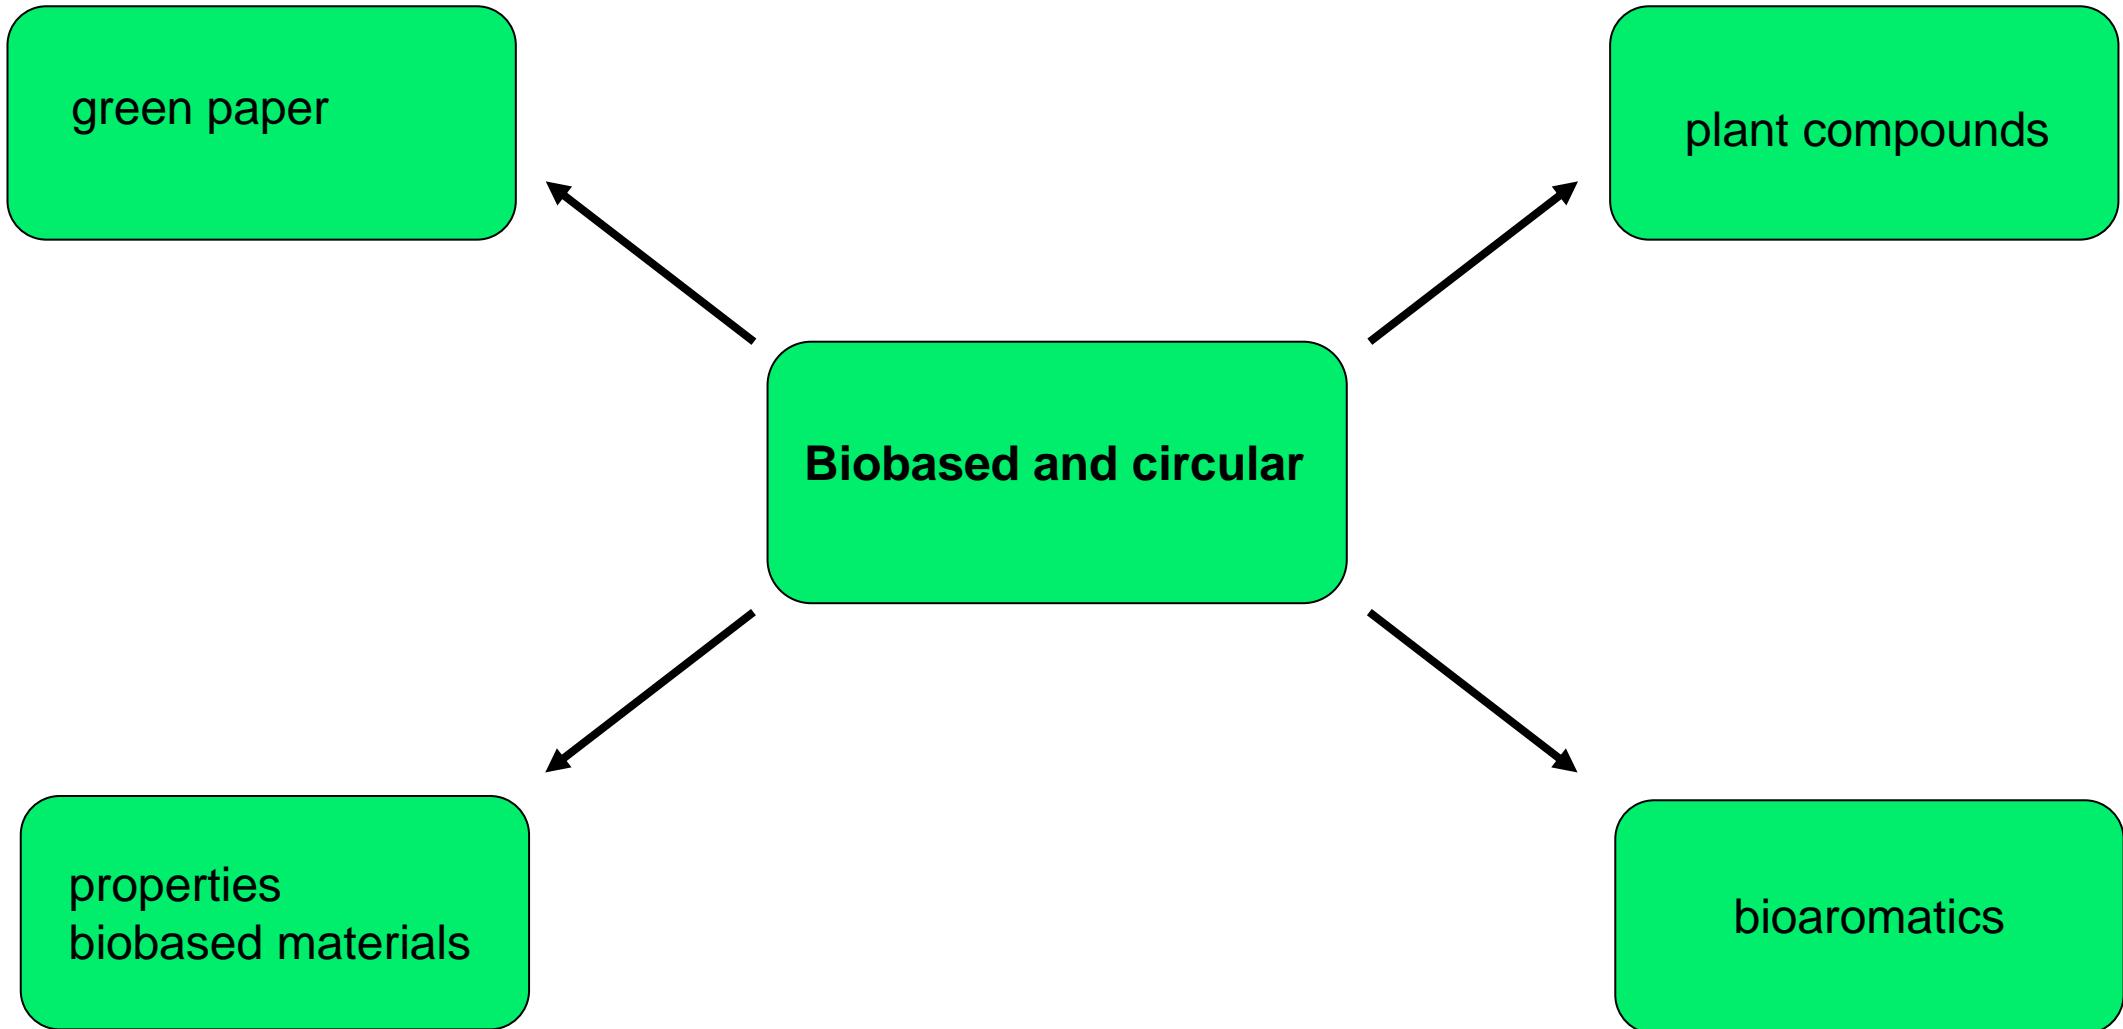

- ✓ Faculty of Engineering and Applied Science (EAS)
- ✓ 8 Technical bachelor programs (4 year program)
- ✓ Chemistry

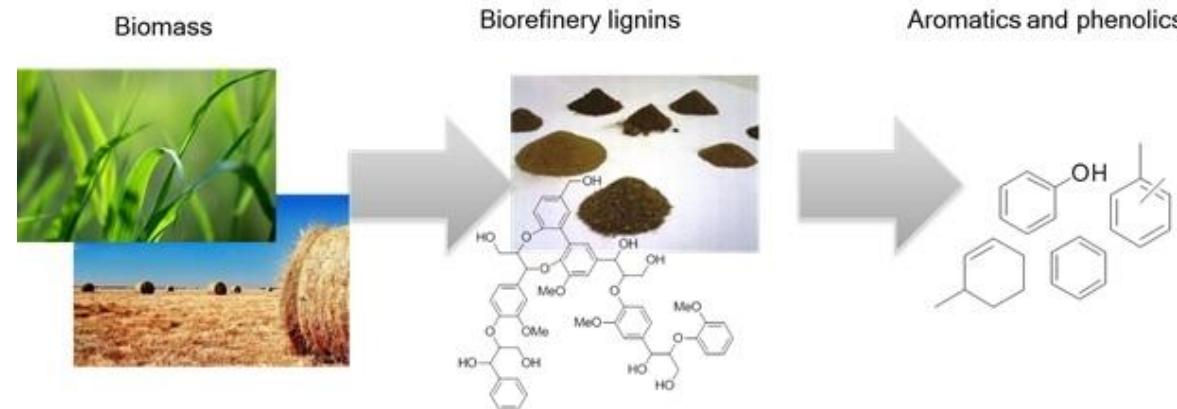

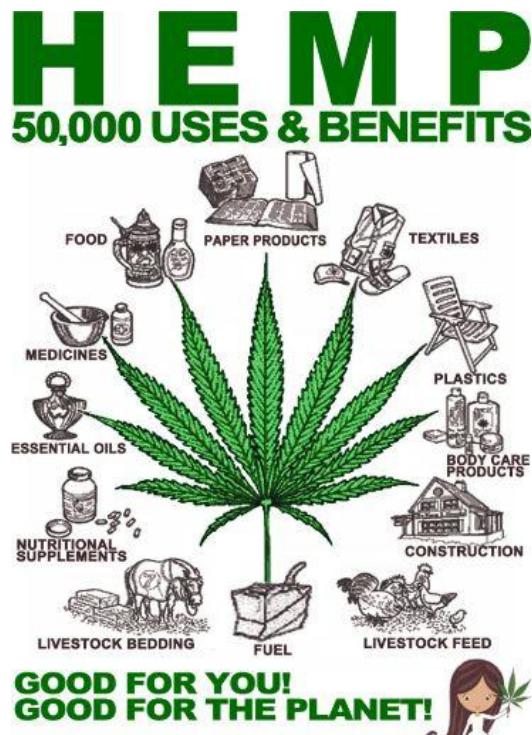

Research:

- ✓ In analytical and physical chemistry, organic chemistry and biochemistry
- ✓ Chemistry related questions from companies!
- ✓ Together with students
- ✓ Multidisciplinary research

COMMUNITY OF PRACTICE

BIOAROMATICS

- ✓ Physical-chemical separation methods and isolation of target molecules (sugars, proteins, cellulose, lignine)
- ✓ Isolated molecules can act as organic solvent, reagent, rheology modifier, ...
- ✓ Isolated lignine can be chemically processed to obtain aromatics, important building blocks for the chemical industry ...

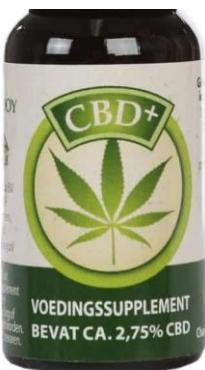

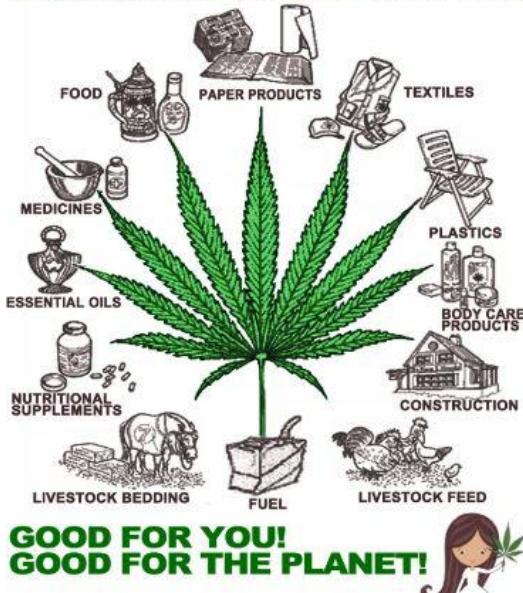

Partners: KCPK Rotterdam, Plantics

Focus Chemistry: Setting up extraction and analysis methods

Future partners: Chemical Technology for upscaling and chemical processing

PLANT COMPOUNDS

HEMP 50,000 USES & BENEFITS

- ✓ CBD-oil consists of a (complicated) mix of molecules, for instance terpenes
- ✓ Terpenes have many applications in medicine and as flavour additives
- ✓ Setting up analytical methods for analyzing the CBD-oil, qualitative and quantitative analysis
- ✓ Quality mainly depends on the harvesting time of the hemp

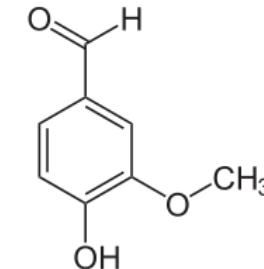

Partners: Trichome Biorefinery

Focus Chemistry: Chemical analysis and investigating the relation between quality and constitution of CBD-oil

PLANT COMPOUNDS

- ✓ Physical-chemical separation methods. For example: extracting vanilla from biological resources)

Partners: BML, WUR

Focus Chemistry: Setting up extraction and analysis methods

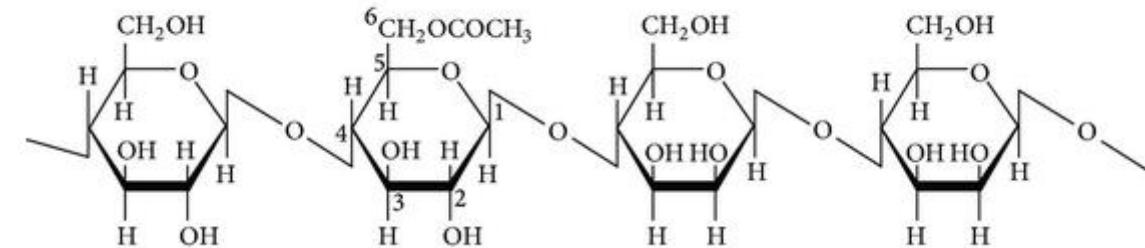

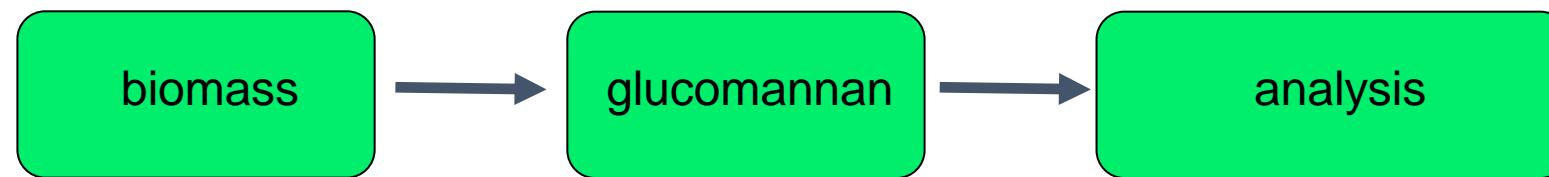

Status: Project just started

Future partners: Chemical Technology

PLANT COMPOUNDS

- ✓ Biochemical quantification methods. For example: quantifying glucomannans from biological resources)

Partners: WUR

Focus Biochemistry: Setting up extraction and analysis methods

Status: Project just started

GREEN PAPER

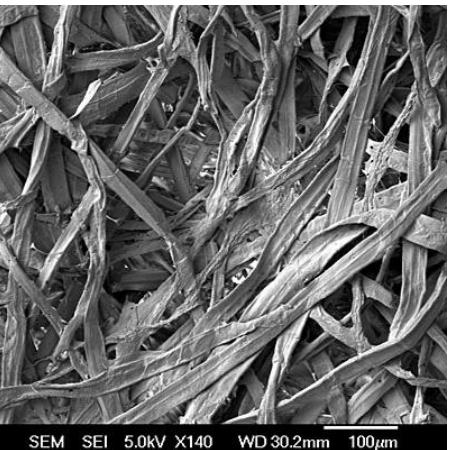

- ✓ Material properties green paper
- ✓ Analyzing molecular constitution of waste-streams

Partners: KCPK, Plastics

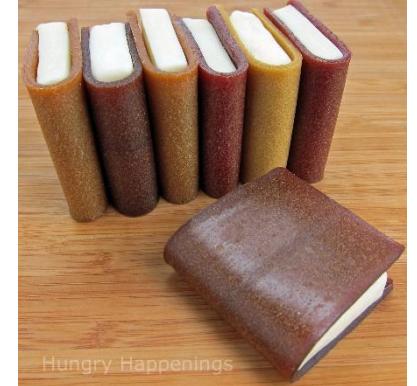

Focus Chemistry:

- Improve material properties green paper water-repellency, biodegradability etc.
- Investigate waste-streams (chemical analysis)

PROPERTIES BIOBASED MATERIALS

- ✓ PLA – based biopolymers
- ✓ Fruitleather
- ✓ Building with seawater (biocomposites)

Partners: SuGu, Fruitleather Rotterdam

Focus Chemistry: Improve material properties fruitleather,
mixing biopolymers for enhanced flexibility, water-
repellency etc.

PROPERTIES BIOBASED MATERIALS

- ✓ Building with seawater (biocomposites)

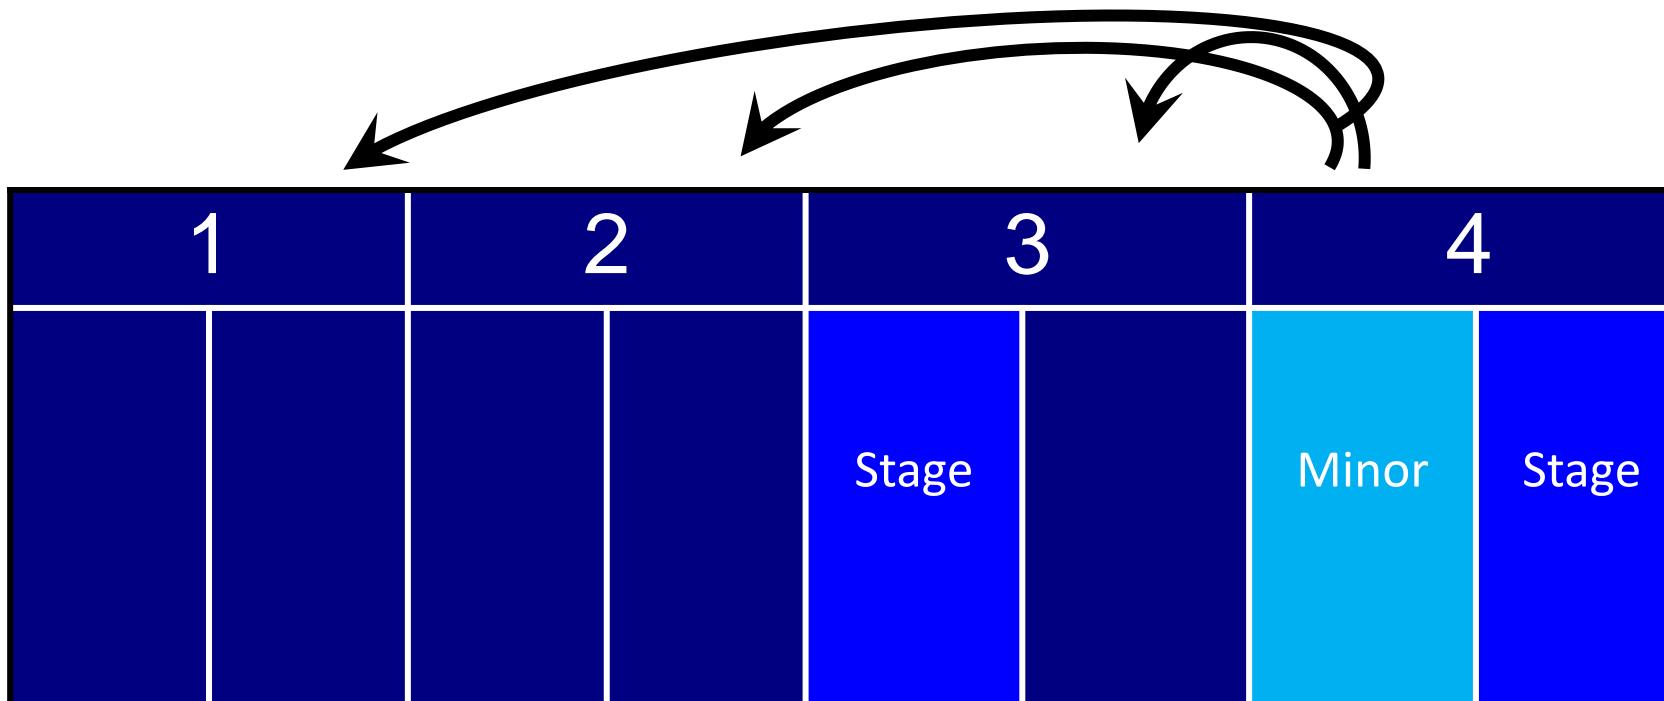

Partners: E. Geboers (The Salt Project)

Focus Chemistry: make composites water-repellent.

ORGANISATIE ONDERZOEK BIJ CHEMIE

- ✓ (Vervolg)projecten uit de EAS-COP minorprojecten
- ✓ Ook andere opleidings-gerelateerde projecten
- ✓ Op het gebied van analytisch-fysische chemie, organische chemie, biochemie en grensgebieden daartussen

ORGANISATIE ONDERZOEK BIJ CHEMIE

Waterproject

- ✓ Onderzoek aan metalen in (afval)water en slib

partner: Milieu Centrum Leiden ("Living Lab")

1	2	3	4
		Stage	Minor Stage

Taalbeheersing en Literatuur

- ✓ Literatuurscriptie

Practicum Chromatografie & Spectroscopie

- ✓ Ringonderzoek

partner: Interscience, Applikon Metrohm,
andere opleidingen Chemie

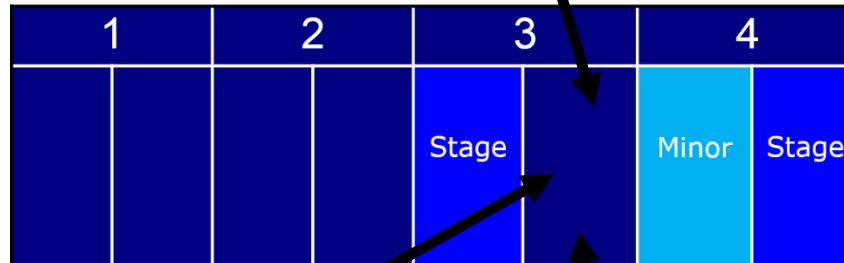

ORGANISATIE ONDERZOEK BIJ CHEMIE

Polymeerproject (synthese en karakterisering)

- ✓ Synthese en karakterisering polymerisatiesystemen

partners: o.a. Rijksuniversiteit Groningen,

Innovatiecentrum Kunststoffen (SuGu)

Project DNA/Biochemie

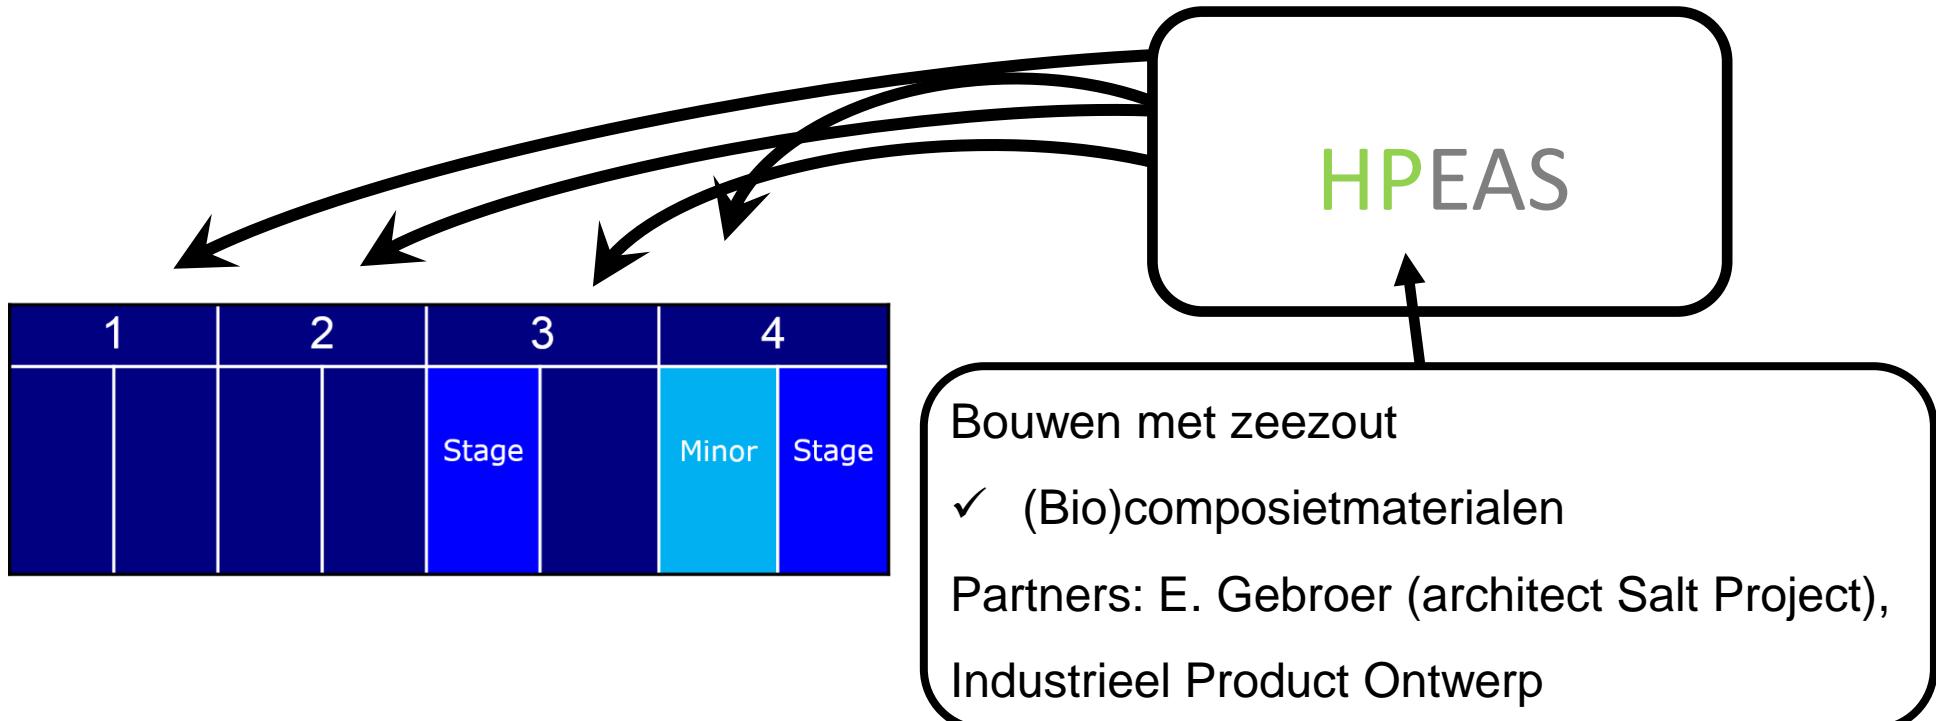

- ✓ Veilige Microbiologische Technieken
- ✓ PCR, InFusion cloning
- ✓ DNA analysis

Project Colloidchemie / Practicum Fysische Chemie

- ✓ Adsorptie en kinetiek
- ✓ Emulsies
- ✓ Soft Matter Chemistry

HONOURSPROGRAMMA BIJ CHEMIE

- ✓ Excellentie-traject voor studenten
- ✓ Onderzoeksprojecten die (nog) geen plek hebben binnen het curriculum

Is the future biobased??
