

**Grassap, het groene
alternatief
voor
strooizout**

Grass2Grit

- Groen alternatief voor 4500 ton strooizout per jaar (NH)
- Drie procent van Nederland bestaat uit bermen
- Bermgras wordt 2x per jaar gemaaid en als afval verwerkt

*Bermgras kan ook geperst worden en verwerkt tot **dooimiddel** & **bio-based wegmeubilair** = **Grass2Grit***

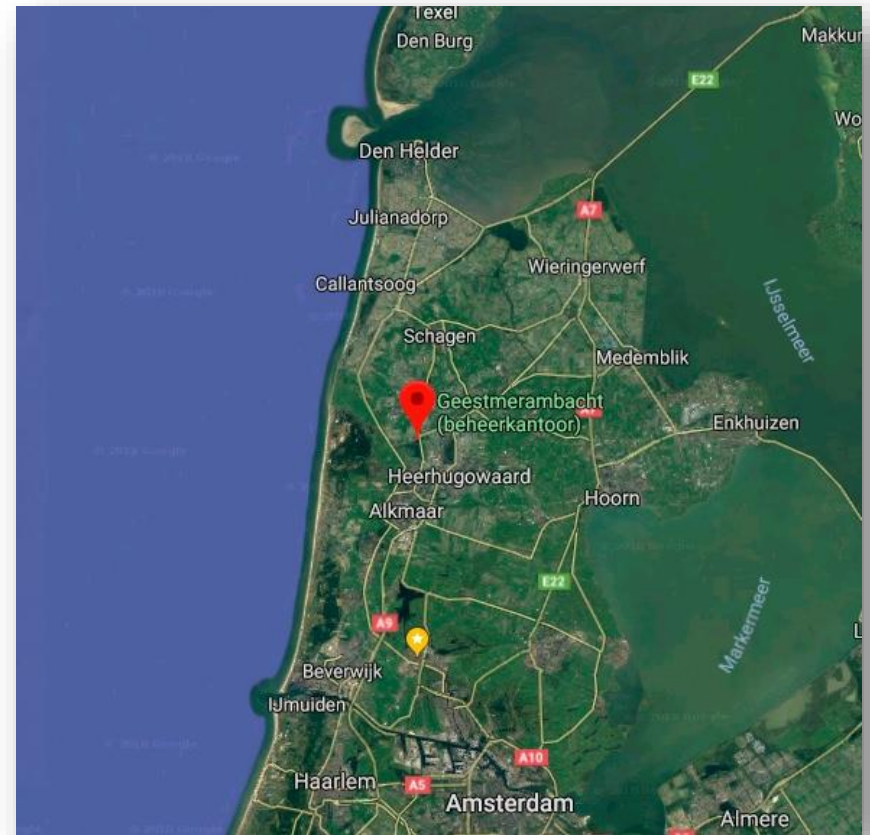

Grass2Grit

Pilotproject op de N504 in Noord-Holland

- Circulair
- Milieuvriendelijk
- Biodiversiteit

EU Life Subsidie 2018-2022:
€ 2,2 mln

LIFE Grass2Grit

Objective	Indicators		Estimated Impact (absolute values)	Estimated Impact (in %)
Improved Environmental and Climate Performance	Reduction of greenhouse gas emissions (GHG)	Reduction of CO2 during the production of road infrastructure	25 tons/year	42% change
		Reduction of CO2 through CO2 capture in biobased material	78 tons/year	81% change
	Waste management	Bio-waste reduction in the form of mowed road verge grass	180 tons	89% change
Better use of natural resources	Reduced resource consumption (excluding energy)	Aluminium	1.6 tons	100% change
		Wood	45 tons	50% change
		Plastics	1.2 ton	100% change
		Mined salt	12 m3/year	50% change
Improved Nature, Species and Biodiversity	Habitats	Road verges of the N504	12 ha	100% change
