GEOSURVEY INTERNATIONAL

MANOR
ESTATE

Geosurvey provide the following services worldwide:

Airborne geophysics utilizing fixed-wing aircraft and helicopters, for electromagnetic, high sensitivity magnetic and radiometric surveys. Computer processing and automated plotting of geophysical data, digital Landsat image processing, analysis and interpretation. Integrated geophysical/geological interpretation of magnetic, radiometric, electromagnetic, gravimetric and Landsat data. Mineral and ground water exploration, photogeology, geochemical sampling, analysis and assay.

Aerial photography using Wild RC 10 cameras capable of wide or superwide angle lenscone and high altitude photography. Ground surveys including engineering surveys, Doppler satellite positioning and photo control. Photogrammetric digital data base compilation, photogrammetric and orthophoto mapping.

Geosurvey has the most modern equipment ranging from specially modified survey aircraft to totally dedicated interactive computer systems. The operational centre based at Wilson Airport, Nairobi, supports 11 survey aircraft, film and geochemical laboratories, a photogrammetric mapping section and teams of experienced surveyors.

The data processing centre at East Molesey, England undertakes the computer processing and interpretation of geophysical data, Landsat image processing and photogrammetric mapping, supported by modern reprographic, draughting and cartographic facilities.
