

Crash Course Data Science in R

Text:

In this one-day crash course you will learn the basics of using R for data science. You will follow along a workflow that will take you from messy dataset to an interactive report. Reports are an integral part of the data science workflow as they can provide quick and valuable insights to your data, for data driven decision making.

You will find the following information:

- 1) A reader where you will find all the content of the course.*
- 2) A presentation for the basics of R refresh introduction (Refresher-Basics.html)*
- 3) An Introduction to the workshop (Introduction.pptx)*
- 4) Several R related files that we will use for the workshop*
- 5) Links to video recordings*
Unfortunately some parts of the lecture are missing in the recordings.

Teachers:

Ioannis Baltzakis and Alejandro Morales Sierra
