

THE GOAL FOR THE WORKSHOP

GOALS

- To discuss and promote reflection on the state of animal welfare inspector training and the need for further training support in European member states (MS).
- To generate feedback on EURCAW's suggestions for standard training of inspectors in relation to EURCAW's dossier and indicators.
- Participants are invited to discuss and evaluate EURCAW's standards-under-development and to assess their relevance.

TRAINING

- Current training for inspectors varies between member states (MS) in quality, relevance and practicality as inspectors often have different educational and professional experience.
- We find there is a need for minimum standards for training activities on pig welfare in husbandry, transport and slaughter for inspectors.

YOUR RESPONSE AND EXPERIENCE

- We hope to get your response in relation to the course standards we have made
- We need feed back on how we shall continue to work with standards for training
- We also need to know more about what your experience is in relation to training of inspectors? What are the challenges? What are best practice?

IN THE FUTURE

- We would like to see examples from your own training that can be transferred between countries. Can we make some sort of “pool” to be shared among Member States
- EURCAW pigs will continue to do workshops in relation to training of inspection of welfare – on farm, during transport, at slaughter
- We need your input on what you would like us to focus on?

PROGRAM FOR TODAY AND TOMORROW

Monday:

- Roundtable introductions – all participants
- Training examples from EURCAW
- Examples of indicators
- Parallel interview Session and presentations in one-hour mini-sessions

Tuesday:

- Sum up on questions to the two prerecorded presentations from *Birgitta, Estelle and Geneviève*
- Presentation on the results of the interviews from yesterday
- Discussion in Plenum
 - In what way are suggestions from other countries and from EURCAW useful in your country?
 - Any further questions, suggestions and feedback on training for inspectors
- Sum up and thank you for participating
