DOES YOUR ORGANIZATION...

1. POLICY
   ...have a FAIR research data policy?
2. SERVICES
   ...have a DCC which provides services to allow research(ers) to comply with FAIR?
3. SKILLS
   ...acknowledge that FAIR capacity building requires specific roles and skills?
4. INCENTIVES
   ...have incentives for FAIR data?
5. ADOPTION
   ...have adoption of FAIR?

Do I-PASS for FAIR?

Definition

A FAIR Enabling Research Organization (FERO) is a research organization with a dedicated staff of data professionals, which has implemented policies on technical, infrastructural and organizational facilities and services to enable the researchers to create and publish FAIR data as a result of their research.

Do I-PASS for FAIR?

	Beginner	Intermediate	Advanced		Score of our institute	Comments/Actions
Policy: Does your organization (institute / university (of applied sciences)) have a FAIR research data policy?						
1. **Are the FAIR principles explicitly mentioned in the data (or research data) policy of your organization?**	The FAIR principles are not explicitly mentioned, but there is a reference to sustainable and long term storage.	The F and A principle are explicitly mentioned.	All FAIR principles are explicitly mentioned (or there is an explicit reference to the overarching Open Science concept).		☐ Beginner ☐ Intermediate ☐ Advanced	
2. **Is the general research data policy translated into faculty/institutes specific data policies?**	Less than 20% of the faculties or sub-units have a specific policy.	20-80% of the faculties or sub-units have a specific policy.	More than 80% of the faculties or sub-units have a specific policy.		☐ Beginner ☐ Intermediate ☐ Advanced ☐ Not applicable	
3. **Is the general research data policy supported by dedicated service units (e.g. DCC) ?**	There are dedicated staff members responsible for the implementation of the services.	There is a dedicated central organizational unit (either virtual or physical) to provide services needed to execute the policy. However some conditions like very large data sets, or FAIR vocabularies are still not fully covered in the services.	We provide and/or facilitate all services for all aspect, also for domain specific interoperability standards and storing large data.		☐ Beginner ☐ Intermediate ☐ Advanced	
4. **Which means and channels are used to communicate the research data policy and services to the researchers?**	We have a website that contains all information, and in addition we have a central (online) helpdesk.	On top of a website with all information and a central (online) helpdesk, we provide regular workshops, webinars and training events.	On top of a website with all information, a central (online) helpdesk and regular workshops, webinars & training events, new researchers are informed of the data policy upon arrival.		☐ Beginner ☐ Intermediate ☐ Advanced

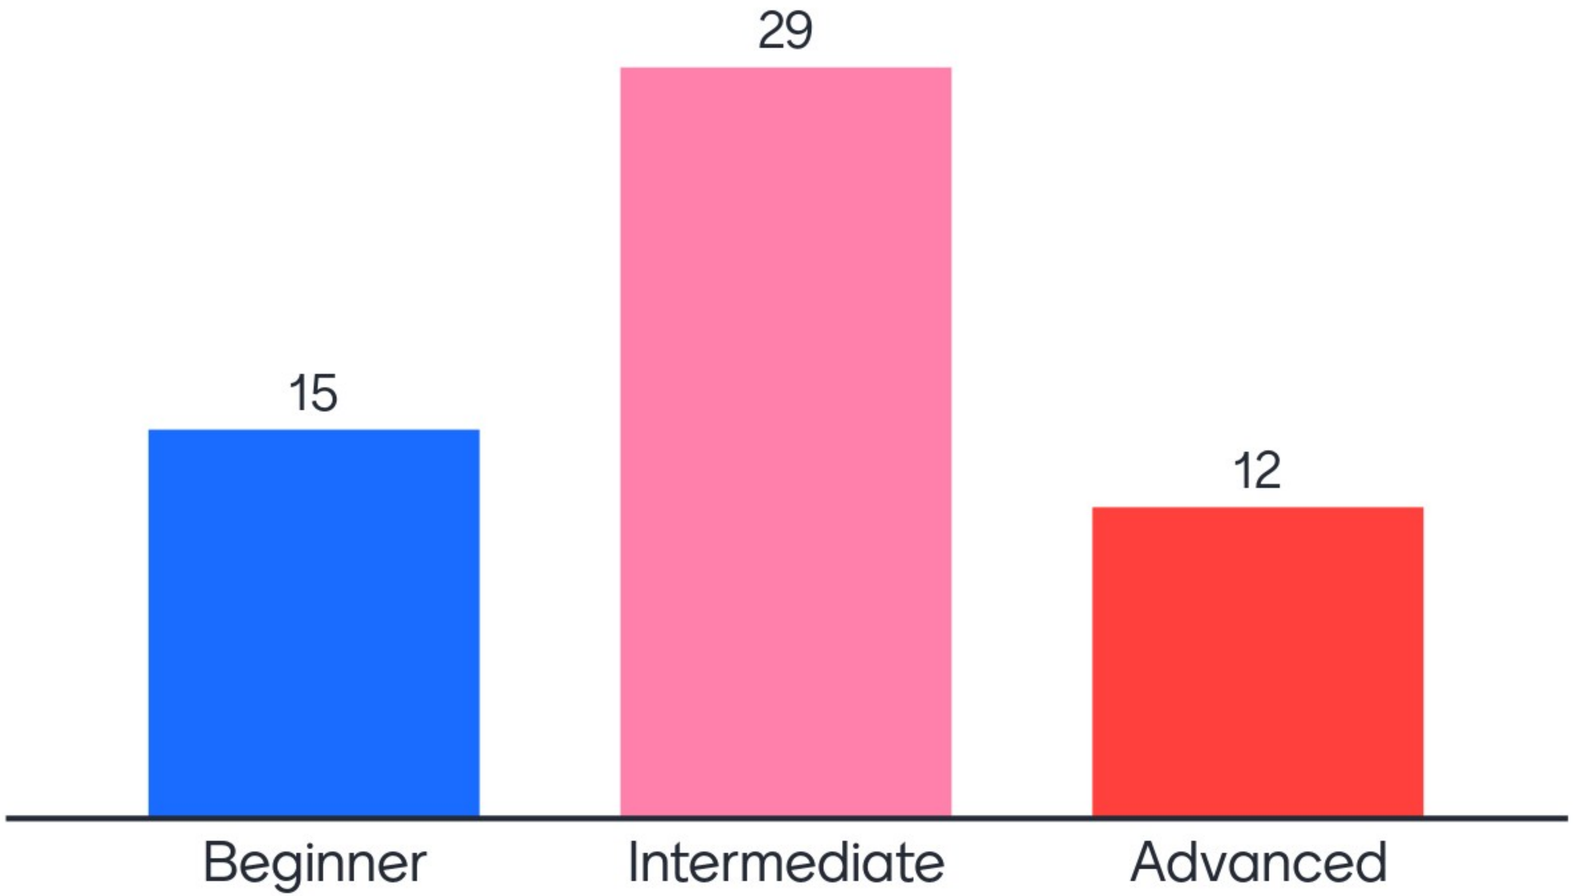
39

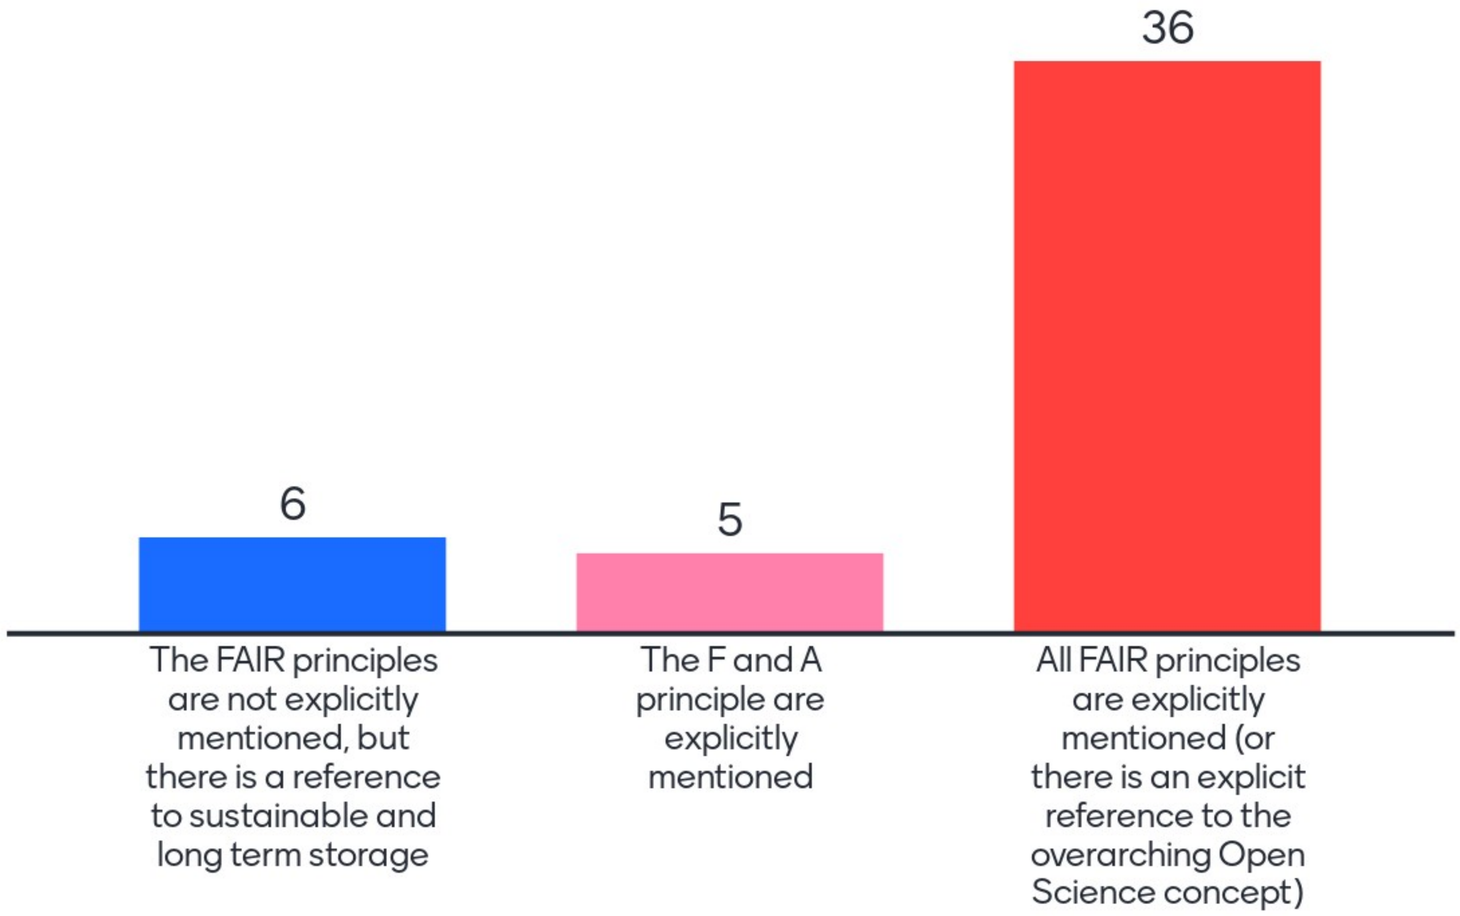
My organization is FAIR enabling at level



Mentimeter

Are the FAIR principles explicitly mentioned in the data (or research data) policy of your organization?

Mentimeter



Which services does your organization provide (or refer to) in order for researchers to comply with the F principles

Mentimeter

We provide a service to deliver a PID for a data set

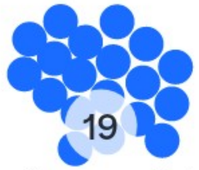
We provide a service for PID and adding metadata (including reference to the dataset)

On top of adding PIDs and metadata, we provide or refer to a service to make the data findable through indexed resources

41

How much of your organizations scientific publications contain a PID reference to the data (take 2019)

Mentimeter



<20% of the publications contain references to the underlying data.

20-80% of the publications contain references to the underlying data.

>80% of the publications contain references to the underlying data.

we do not know

53

What are your organization's most important challenges in becoming FAIR enabling?
