

# Nature inclusive building in OWFs in the Netherlands

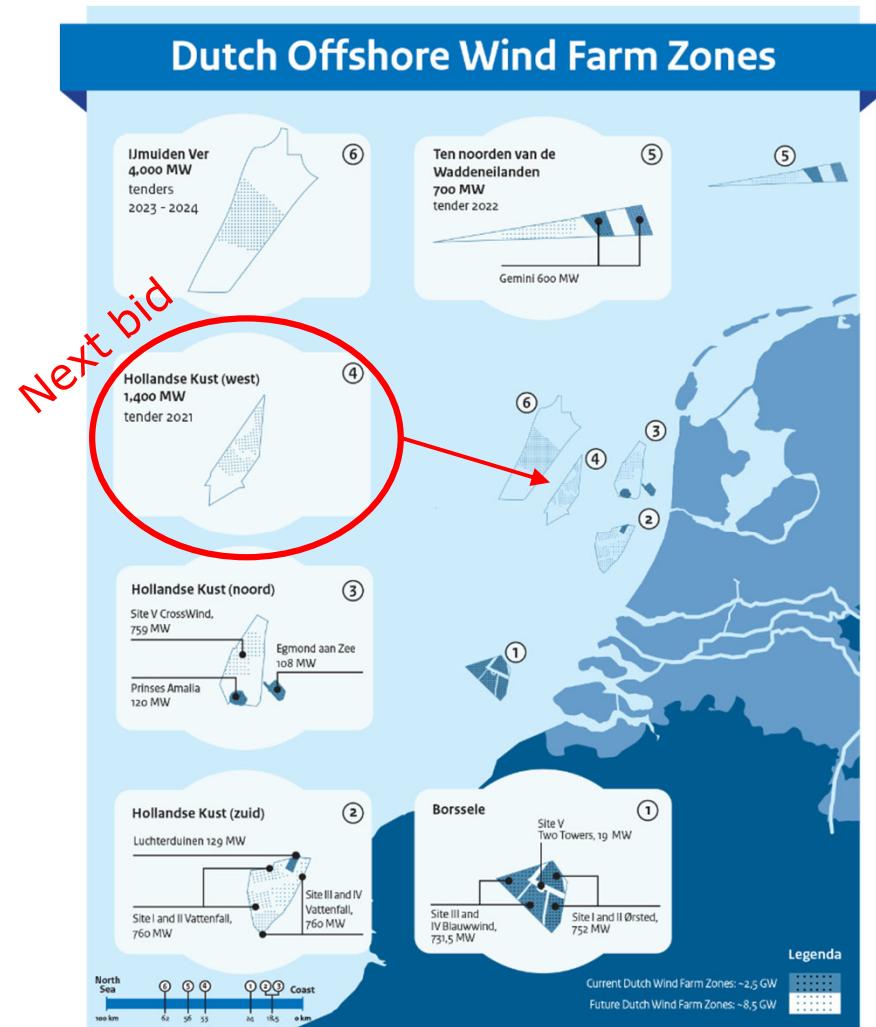

12 Oct 2022

Oscar Bos, Wageningen Marine Research

# Development of Offshore Wind in NL

- Offshore wind 2015->2030: 11 GW
- Ecology is important
- Next bids: points for ecology
  - Mitigation (birds, bats)
  - Nature inclusive building (benthos, fish)

<https://offshorewind.rvo.nl/>

# Nature restoration pilots

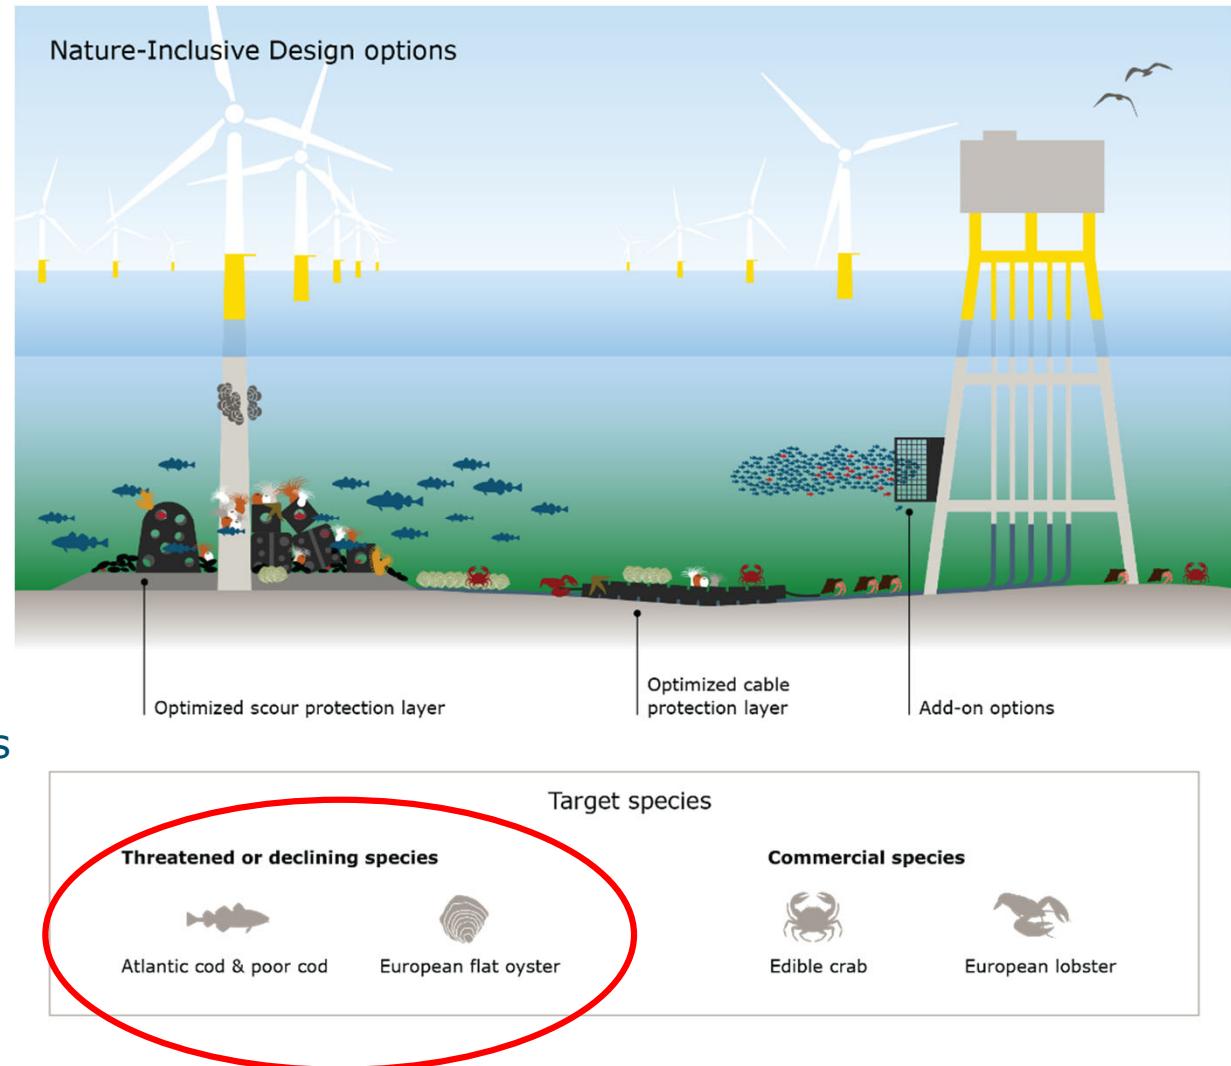

- Focus on policy species (Natura 2000, OSPAR, MSFD, commercial species)
  - Native oysters (OSPAR)
  - Cod (OSPAR)
  - Sharks/rays (OSPAR,MSFD)
  - Crabs / lobsters (commercial)

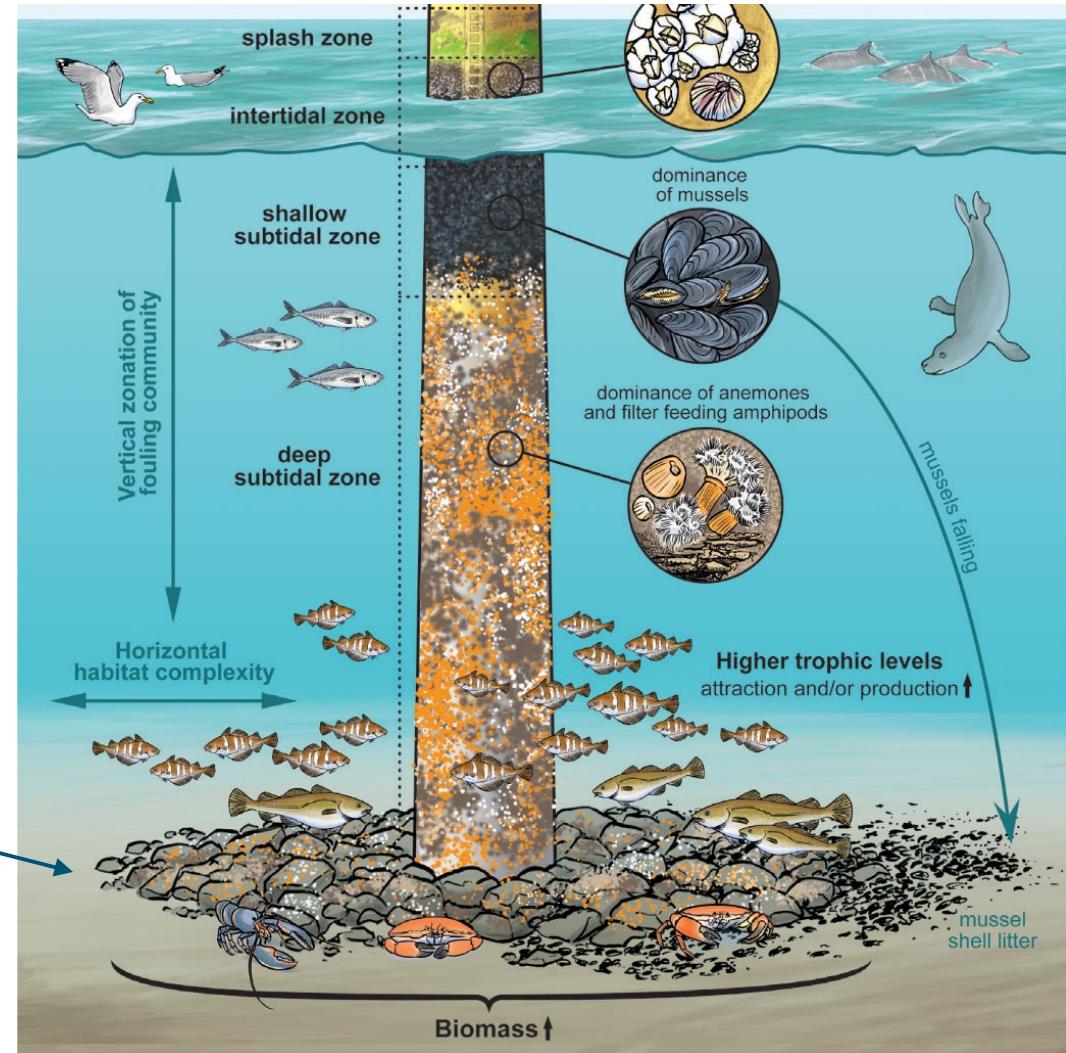

# Nature inclusive design options

- Optimized scour protection
  - Larger stones: hiding spaces
- Optimized cable crossings
  - Limestone: attract species
- Stand alone and add-ons
  - Artificial reefs: nursery

# Optimized scour protection

- Increase reef effect
  - larger stones
  - hiding spaces
  - feeding area

# BENSO - Dogger Bank expedition Sept 2021

Photo: Klaudie Barteling/DMP

# Optimized Scour protection layers

- Test different scour protection configurations (BENSO project)
- Deployed NL Dogger Bank in 2021
- 2022+2023 assess biodiversity and retrieve.

*Tagged cod  
(year patterns)  
(research E.  
Winter, WUR)*

*Artificial  
reefs  
Borssele 2*

# Nature Inclusive Design (NID) in offshore windfarms in NL

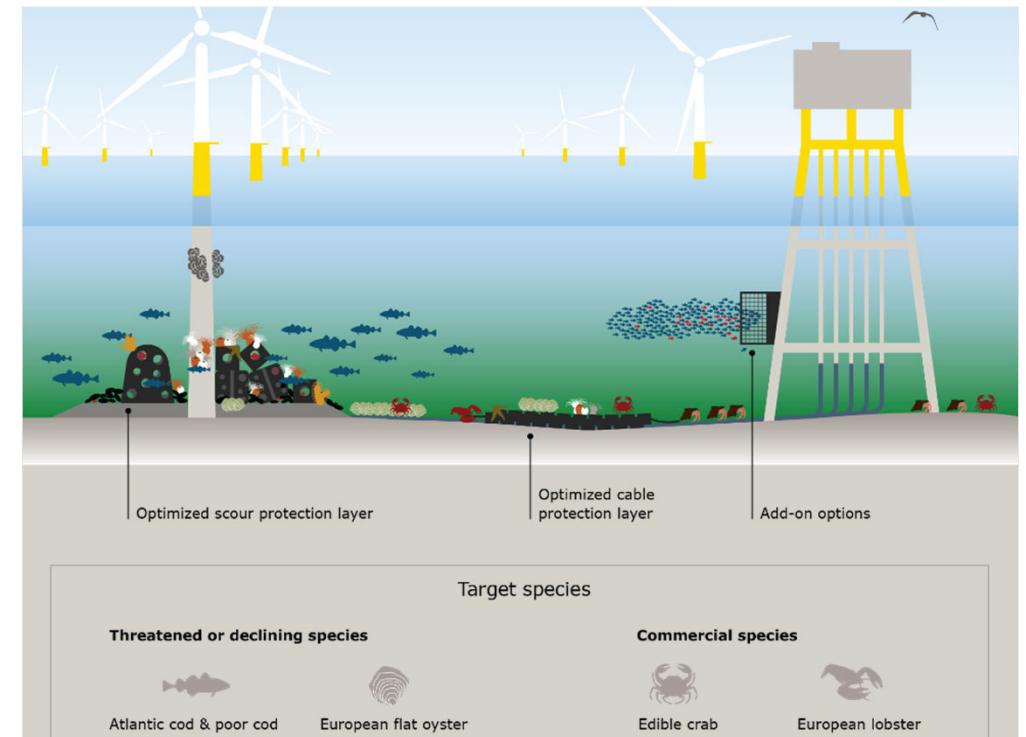

- Incentivised by NL government
- Focus on policy species and improving native biodiversity
- Small scale: test concepts
- Rollout: apply proven concepts

<https://offshorewind.rvo.nl/>

# Research 2022-2030

- Government
  - Impact on ecosystem
  - Costs and benefits
  - Fail and succes factors
- Offshore wind parties
  - Local impact
- Government, industry, research institutes and NGOs work together

Thank you for  
your attention!

To explore  
the potential  
of nature to  
improve the  
quality of life
