Error in Figure

In the published article, there was an error in [Figure 5](#) as published. The lines in the figure are inverted by mistake and the X-axis should represent time (i.e., pre and post) instead of condition (i.e., interactive and passive). The corrected [Figure 5](#) and its caption “Plot diagram of portion size self efficacy” appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
