

# The 'Oostwaard' Farm of the Future

Peter Goedbloed

## Central theme: bio-remediation of soils and sediments in an energy plantation

- eco technical
- innovative
- informative
- recreation
- commercial

Integration of water and energy cycles with agricultural land-use and environmental values.

## Research theme's

- Ripening of sediment
- Predictive tests
- Application techniques
- Growing techniques
- Crops / genotype
- Activity in rhizosphere
- Salted sediments
- Removal, reuse
