Protein transition

Support the process towards a sustainable protein production and consumption

Jan Broeze, Johan Vereijken

Transition: mutually stimulating developments

- Economy
 - How do the current economic developments affect the process?
 - o What new chances come up?
- Culture
 - o How do citizens/consumers react?
 - o How to exploit current societal attitude?
- Technology
 - o What product developments are needed?
 - taste
 - texture
 - etc.
 - o How to offer novel proteins?
 - alternatives for basic meat products?
 - semi-finished? in ready meals?
 - innovative/alternative tastes?
- Institutions
 - o Influence of producers retail consumers?
 - o Position of traditional protein producers?
 - o New chances for agro production chains?
 - o Influence of other organisations?
- Nature and environment
 - o Sustainability effects?
- Etc.

Dairy products: help or hinder transition?

Food Procurement Pyramid

"Butter to margarine transition" was initiated because of availability problems for butter. Current developments are driven by health/ethics issues.

This project is financially supported by the Dutch ministry of LNV, Knowledge Base research project KB-07-003-0008
